Nato chief faces new pressure over corruption claims

Nato secretary-general, Willy Claes, was expected to come under new pressure to resign his post after Belgium's highest court requested permission from parliament to indict him on corruption charges. The news could unsettle the 16-nation defence alliance at the centre of attempts to negotiate peace in Bosnia. Nato puts future on line, Page 2

Scottish Power wins battle for Manweb: British electricity supplier, Scottish Power, won a £1.1bn (\$1.7bn) battle for control for regional electricity company, Manweh, after gaining just over 80 per cent of the shares. It is the third successful bid for a UK regional electricity company and will create the first group to combine electricity generation with distribution in England and Wales. Bid that sparked a trend, Page 5

Unisys to split operations into three businesses

US computer group expects \$400m of cost savings and further job cuts

in San Francisco

Unisys, the US computer group formed in 1986 by the merger of Burroughs and Sperry Univac, is to split its operations into three independent businesses, scrapping its complex management

The streamlined structure. which will be in place by early next year, will lead to cost savings of about \$400m by the end of next year, Unisys said. The company, which shed

about 4,000 jobs last year, said it mance by focusing increasingly would further cut its workforce on growth opportunities in combut did not know how many jobs would be affected. A "significant", as yet undefined, charge will be taken against earnings in the fourth quarter to December this year.

The move is the latest in a series of restructuring efforts over the past four years as the company has struggled to

puter services rather than on its declining mainframe systems Unisys returned to profitability

in 1992 after three years of heavy losses. However, the company reported sharply lower net profits last year of about \$100m. Mr James Unruh, chairman

and chief executive, insisted that

change in strategy, but it would substantially affect the way the

company operated. Under the plan, Unisys will be split into threa business units: computer systems, including hardware and software products; information consulting and helping companies to create computer networks; and global supwhich includes maintenance and support ser-

vices. Each unit will have its own

marketing and sales organisation as well as responsibility for its own financial performance. Mr Unruh said the matrix man-

agement structure - with a sin-gle sales force and integrated marketing operations - which the company had previously adopted had been necessary when new businesses were being huilt, "but to move forward successfully requires speed and flexiOver 40 per cent of Unisys's business was now growing at donble digit rates, Mr Unruh said. "These new businesses are now large enough and mature enough to he largely selfsufficient in their structure."

Unisys's service businesees now account for about half of its revenues, which were \$6bn in

Wall Street reacted positively to the restructuring announcement. Unisys stock was trading at \$8% late yesterday, up from Thursday's close of \$7%.

Franc hit by Juppé resignation fears as PM quits home

By David Buchan in Parls

Mr Alain Juppé, the French prime minister, announced yesterday that he and his children would move out of their city-owned flats in Paris in an attempt to ward off allegations that he abused his past position. as the city's deputy mayor to house his family.

He made the announcement at the end of a day in which the Bank of France tightened leading to halt a slide in the franc caused by rumours that he might resign as the result of a deepening legal probe into the housing affair.

Mr Joppé's office denied that he had any intention of resigning, but he would be expected to take that step if the Paris prosecutor placed him under formal Investigation The central bank narrowed its

"repurchase" lending facility from 5-10 days to 24 hours, reducing the period over which short-term funds can he borrowed in a bid to increase uncertainty for borrowers speculating against the franc. The Bank of France last took this step when the franc came under pressure in March during the presidential election campaign. Yesterday's Against the D-Mark (FFr per DM) 3.46 3.50 3.54

Source: FT Exte

drop in the franc, which lost 4 centimes to close at FFr3.5110 to the D-Mark, was sparked by confirmation from the Paris prosecutor's office that it had opened a "preliminary" investigation into the allegations surrounding Mr Juppe's apartment. By moving himself and his children, th prime minister said he hoped to 'turn the page" on the housing allegations, which had "deeply wounded" him.

His move followed police questioning yesterday of a former city employee on his testimony that Mr Juppe had, as deputy mayor, exercised effective control over allocation of apartments.

The Association for the

Defence of Parisian Taxpayers (ADCP) has asked the prosecutor to investigate Mr Juppe for improper interference in public administration for awarding him-self in 1989 an apartment, which was renovated at a cost of FFr1m and re-let at a rent of FFr12,000 a

These developments come at a bad time for Mr Juppewho, with President Jacques Chirac, has plummeted in the opinion polls. Mr Juppe has pledged to cut budget and welfare deficits suffi-

ciently within the next two years to qualify France for European monetary union. But unions have called a general 24-hour strike in the public sector next Tuesday in protest at his plan to freeze public pay next year.

This will underline his difficulty in persuading the country of the need for austerity and alc shake the confidence of the financial markets in his measures

However, the markets took renewed rumours about Mr Juppe's possible resignation badly because they believe France would stand an even worse chance of cutting its deficits under possible successors.

Eurotunnel suffers heavy loss in first half

By Geoff Dyer and William Lewis in London and Andrew Jack

Eurotunnel yesterday fired the opening shot in negotiations with its banks as it disclosed higher-than-expected losses for the first half of the year. Sir Alastair Morton, co-chair-

man of the Anglo-French opera-tor of the Channel tunnel, rejected a debt-for-equity swap as a solution to the financial crisis which forced the company to snspend interest payments on £8hn (\$12.4bn) of deht last month.

Interim pre-tax losses were £464.5m for the six months to June 29, against analysts' expectations of between £300m and

In a statement that will bring some relief to Enrotunnel's shareholders, who would see their holdings dilnted under a debt-for-equity swap, Sir Alastair said: "We will not propose a massive debt-for-equity swap and ne banks have not proposed i to ns." However he conceded that a swap could not be ruled out as a "last option".

The company intends to preseut a restructuring plan to its 225 banks by the end of January. It said the plan would need the approval of all the banks. The

Alliance plays for high stakes by taking on task of policing a settlement

Nato puts future on the line in Bosnia

Russia objects to placing its soldiers

By Bruce Clarke in Williamsburg, Virginia

The Nato alliance, which has been struggling to define its role since the Soviet collapse. has set itself a formidable challenge hy accepting the task of policing a Bosnia settlement.

If it succeeds, it will prove to a sceptical world that its efficiency as a multinational fighting machine makes it well qualified to discharge "out of ea" military missions at the United Nations' behest.

If it fails - or if the cost of remaining in Bosnia proves too high for a nervous US public during a presidential election year - then the whole principle of US-European military co-operation could be threatened.

Mindful of the high stakes, Nato defence ministers have been trying, at a meeting in Williamsburg to nail down the terms on which they will deploy up to 70,000 troops.

The operation cannot begin unless forthcoming negotiations in Washington between the ex-Yugoslav republics bear fruit. On balance, most of the ministers in Williamsburg do expect the US diplomatic

Russia, which has traditional ties to the Serbs, is prepared to offer soldiers for a multinational force in Bosnia to enforce a possible peace settlement, a Russian envoy told AP in Rome.

"Russia is prepared to participate in a multinational force to implement the peace accords," Mr Igor Ivanov, Russia's vice-minister for foreigo affairs, said after talks in the Italian capital with Mr Richard Holbrooke, the US peace envoy, and other officials.

Mr Ivanov gave no details about the size of the force Russia could send, nor did he ontline any demands for its leadership. Nato commanders have said

They want Nato to have maximum freedom of action in military activity, while leaving bumanitarian and reconstruction tasks to the UN and other civilian agencies.

The Nato mission should have a clear time limit of one year, and the settlement, including the contours of the Serb zone of Bosnia, should be as precise as possible.

The "implementation force" - known as I-FOR – could only function if the peace agreement enjoys the strategic con-

under command of the western alliance. Mr Holbrooke said the possible peacekeeping force "will include non-Nato nations", but did not say which ones. The Rome meetings, which began after

Mr Holbrooke arranged a Bosnian ceasefire pact on Thursday, focused on ways to make peace permanent in the

Participants included representatives from Bosnia, Croatia and Yugoslavia as well as European, Japanese and Canadian officials. Mr Holbrooke noted that the truce, set to begin on Tuesday, was just a first step in ending the 3½-year civil war.

Peace talks, scheduled to begin in the US on October 25, will now be delayed until bout October 30, US officials said.

"Let no one think that peace is imminent or around the corner or that the peace talks will produce immediate results," Mr Holbrooke said.

One obstacle is eastern Slavonia, a small swathe of land seized from Croatia hy rebel Serbs in 1991. Serbs agreed in principle earlier this month to return the area, but no date for the transfer has been

"This could potentially overshadow and undermine the peace effort in the region," Mr Holbrooke said

the parties which are likely to the problem of how neutral it amount in practice to internal

can really be. On the face of things, Nato's brief will be to "react against any party which violates the ceasefire" and set aside the previous sympathies of member states. Yet even as the force gets to work, at least one member - the US - may be intensifying its efforts to hoost the strength of the Moslem-led Bosnian army.

But military might alone will not be enough to guarantee the Mr William Perry, US defence secretary, has said Washington will try to proalliance success in negotiating the political problems it is mote a general "huild down" of bound to face - starting with arms in the conflict zone, but if other countries would work to "professionalise" the Bosnian

European members of Nato have queasily accepted this formula, on condition that every effort be made to promote dis-armament. But it remains unclear whether the US and its allies are really on the same wavelength.

British and French officials accept in theory, at least, the principle that the Moslem-led forces are at a disadvantage compared with the Serb-domi-nated Yugoslav army or the forces of Croatia, and that ome case exists for correcting this imbalance.

US officials, by contrast, speak of helping the "federation army": in other words, both sides of the fragile Croat-Moslem coalition which was stitched together last year.

The deep US commitment to Croatia, and the vital role which Croatia will play in providing infrastructure for the I-FOR, raise questions about how tough Nato could ever be with forces under Zagreb's control if they violated the cease-

shines light on murky politics There were no televiaion cameras, no endless months of advocacy, and not even a jury. But the trial on corruption charges of a former mayor of Grenoble has been watched closely for the messages it has for France. In a stark modern courtroom

> lin, Dauphine News and the former commercial director of Lyonnaise des Eaux are all on trial alongside Mr Carignon, for whom the prosecutor has demanded five years in prison. a FFr500,000 fine and a fiveyear ban on public office. Their defence is largely one of denial and of no concrete evidence linking any payments strictly

> The broader question for France is whether such scope for potential corruption remains in the award of public service contracts. The early 1980s, which brought considerable devolution of power and money from central government to local authorities. opened up considerable scope

Facing additional charges of

around Mr Alain Juppe, the prime minister show, there is also the growing power and apparent willingness of judges to launch inquiries, backed by a new sense of indignation in both the media and public opinion.

As for Mr Carignon, he bas to run again in the next munic-Gaullist supporters were ousted in the most recent elecions in June by the Socialists who were allied with the ecologist candidate who helped expose the allegations against

ings to be negotiated every production inside the EU.

The agreement also contains opening up the EU market. with a view to removing all restrictions by the end of 1999. Liberal critics argue that the quotas are meaningless and should be scrapped since Japanese imports consistently fall

short of them. However, they serve as a comfort to European car producers and also encourage Japanese manufacturers to move

Brussels forecast in March

that the EU car market would grow by 4.3 per cent this year but has since lowered the figure to 1.7 per cent. The official added that

imports from Japan this year were expected to fall about 100,000-150,000 short of the new ceilings, because of sluggish demand in the EU, and also because of the strong yen. Last year imports reached 815.911. considerably short of the 993,000 quota ceiling. Individually, the quota for

the 89,600 agreed in March to 88,700; Italy's from 56,800 to 55,300; Portugal's from 39,500 to 32,800; Spain's from 42,900 to 40,400; and Britain's 186,300 to

182,700. The quotas do not cover Japanese cars manufactured inside the Union.

A Commission official said reducing the quotas was of no practical consequence for this year, but there was no desire to scrap them altogether since the situation could change

The presiding judge in the trial of former Italian prime minister Giulio Andreotti on Mafia charges began last night to consider whether proceedings should be moved to Rome. Judge Francesco Ingargiola, presiding over the hearing in Palermo's high-security courthouse, and two other tribunal judges were inspecting papers relating to Mr Andreotti's alleged complicity in the murder of a journalist in Rome in 1979. Yesterday's brief court session was the first since the trial opened at the heginning of last week. Mr Andreotti, pictured above talking to reporters in the courtroom on the opening day, was not present yesterday. AP

Debt talks bring capital markets within Russia's reach Approval of \$30bn London Club accord - by no means a foregone conclusion - would

preliminary deal reached in London this reached in London this week could herald a restructuring of Russia's com-mercial deht before the end of the year.

Reached after four years of bumpy negotiations, it must be approved by the Russian government and the commercial creditors. If that happens, it is expected to have wide implications for Russia, increasing the confidence of western inves-tors in the economy and improving Moscow's prospects for borrowing money abroad. "We are clearly closer to an

agreement than ever before," said Mr Jonathan Hoffman, chief economist at CS First Boston in London. "For Russia and the Russians this is going to be a hig step forward for its international creditworthi-

One of the many casualties

have wide implications for Moscow, write Graham Bowley and Chrystia Freeland of the collapse of the Soviet restructuring deal is crucial tional markets," said Mr Igor Union was Moscow' interna-

tional credit rating. Under Soviet rule, the Kremlin had earned a reputation for paying its foreign bills punctiliously, but when the communist edifice began to crumble in 1991 the USSR defaulted on its loans. Since then, Russia. which inherited the Soviet debt, has not yet reached a new deal with the country's foreign creditors.

The putative agreement concerns what is known as London Club debt - the \$30bn or so which Russla owes a group 600 western commercial banks - on which no repayments, of principal or interest, are currently being made. A because, without one, Russia is unlikely to be able to borrow on international capital mar-

In an effort to finance its budget deficit without resorting to the traditional practice of simply printing money, the Russian government has launched an ambitious domestic borrowing programme. It would like to supplement the rouble-denominated treasury bills with debt issues aimed at western capital markets. "It [a London Club deal] is of

great importance for the Rus-

sians, probably more so than

for the commercial banks, if

they [the Russians] want to get

fresh financing from interna-

Sitnin, vice-president responsible for emerging markets at the Bank of America in Lon-

According to the technical agreement reached in London this week the defaulted debt would be restructured into new loans to be repaid over 25 years, with an interest rate of 81.25 basis points (one basis point is one one-hundredth of a percentage point) over the Lon-don Inter-Bank Offered Rate (Libor). There would be a seven-year grace period, during which no principle would be

Russian and western observers see the deal as a shift in Moscow's favour; the commercial banks were pushing for a 20-year rescheduling with a five-year grace period. "Our views have made great prog-ress," said Mr Mikhail Kasyanov, head of the Russian finance ministry's foreign debt dapartment. He said the western commercial banks saw the new terms as "ambitious" but

Paradoxically, however. some observers are concerned that Russia could scupper the deal. They fear that the nationalist, anti-western fever which is taking hold of Russia as the country prepares for December parliamentary elections could block an agreement. One rallying point for nationalist objec-

believed they would approve

under the draft agreement. Russia would fully repay its debt, in contrast with other countries, such as Poland, which were granted generous debt forgiveness when their loans were restructured after the collapse of communism.

"We should not undarestimate the political resistance in Russia to the deal," Mr Hoffman said.

If an agreement is not reached before the December 17 elections, some believe it could be years before Russia negotiates a deal. Recent opin-ion polls suggest that the legislature will he dominated by anti-western communists and nationalists who might thwart

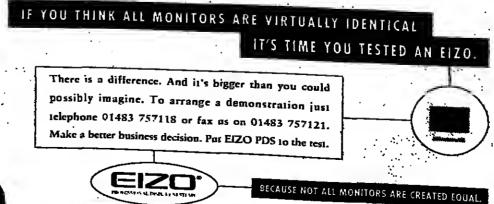

an accord with the western commercial banks.

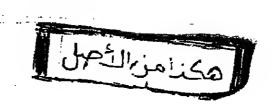

"If we do not get lt [a deal] this time, then we can forget about it for a long time," Mr

If the agreement is approved, Russian debt could rise to prices as high as 45 per cent of face value from its current level of 32.5 per cent, in the view of some analysts. But for now, with Russia's volatile political climate in mind, debt traders are taking a cautious approach.

The risk that people are looking at now in terms of buying and holding the debt is whether a more anti-western parliament gets put in place." said a trader at a US bank in London. "The move [this week's preliminary agreement] is a step in the right direction. but the big question mark is the political risk."

Rise in US jobs points to steady growth

By Michael Prowse in Washington

US payroll employment grew modestly last month, providing further evidence that the economy is returning to a stable growth path after weakness earlier this year.

The Labour Department said non-farm employment rose 121,000 last month, slightly less than Wall Street economists expected. However, following a along its full-employment ceil-robust increase of 262,000 in ing," said Mr Robert Dederick, August, the latest figures were consistent with annualised economic growth of about 2.5 per cent, in line with the economy's long-run potential.

The employment gain was sufficient to hold the jobless rate stable at 5.6 per cent, but not large enough to put upward pressure on inflation. "The economy is gliding

economic consultant at Northern Trust, a Midwest hank. "Growth is neither too fast nor too slow - the Federal Reserve is getting better news than any

central bank deserves." "This is a 'golden age' economy," said Mr Allen Sinai, chief economist at Lehman Brothers, the New York investment bank, referring to the low joblessness rate, lack of upward pressure on inflation and continuing strength of corporate profits.

The Fed last month decided not to cut interest rates because the economy appeared to be rebounding naturally from sluggish growth in the secood quarter when gross domestic product grew at an annualised rate of 1.3 per cent. While generally encouraging. yesterday's figures showed that joh growth remains concentrated in the service sector. Employment in services rose 106,000 last month, with solid gains in retailing and healthcare. Construction added 16,000

Employment in manufacturing, however, fell 32,000, bringing total job losses since March to 200,000. The sector was forced to cut production earlier pected rise in inventories of unsold goods. That adjustment, however, is

now thought to be largely com-

plete. Many economists regard job losses in manufacturing as the by-product of a sharp improvement in productivity, which is growing at an annual rate of 2 per cent, twice as fast as in the upturn of the 1980s.

INTERNATIONAL NEWS DIGEST

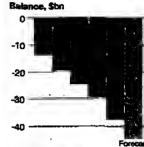

IMF seeks big capital increase

The International Monetary Fund would like to see a significant boost in its capital, Mr Philippe Maystadt, chairman of its policy-making interim committee, said yesterday. Mr Maystadt said a majority of Fund members appeared ready to support a "substantial increase" in the quotas or subscriptions which determine each member country's shareholding in the institution. He estimated a 60 to 70 per cent increase would be feasible, but agreement by the US would be crucial. The possible quota increase will be the first item on the committee's agenda tomorrow.

The interim committee is also expected to endorse proposals to speed the Fund's response to financial crises like that which overwhelmed Mexico at the turn of the year. This "emergency mechanism" or "procedure" would, for example, require the executive board to decide on an emergency loan within 48-72 hours. Robert Chote and George Graham, Washington.

US fears growing China deficit

US/China trade

1991 92 93 94 95 96

The US expects its trade deficit with China to reach \$38bn (£24.5bn) in 1995 and \$45bn to \$50bn in 1996. "Just to be candid, our side of the bilateral relationship is not so rosy." Mr Lee Sands, assistant trade reprentative for China and Japan, told a business seminar in Hong Kong yesterday. "US exports to China rose only 6 per cent last year, despite the competitive strength of our industries. It is possible that in a few years our deficit with China will be larger than the deficit with Japan." The US

had a trade deficit of \$30bo with China in 1994, second only to its \$66bn deficit with Japan. It recorded a \$108bn global deficit last year. Mr Sands said 40 per cent of China's exports went to the US, making it China's largest and only truly open export

Italy cuts helicopter order

Italy has ordered 16 Anglo-Italian EH 101 helicopters, worth more than £300m, after a delay of more than two years. The order is much smaller and less costly than expected. Italy had been expected to order 34 anti-submarine warfare versions of

Instead it will buy only eight ASW helicopters with eight substantially cheaper surveillance and transport versions of the EH 101. The helicopter has been developed equally between Britain and Italy and the two countries were expected to order roughly equal numbers.

Britain has already ordered 66 EH 101s, including 44 of the anti-submarine version, while Italy bas now only ordered a quarter of that amount. Despite that, Agusta of Italy will get more than 50 per cent of the work on the Italian order, and is entitled to half the work on all the UK versions. Budgetary constraints in Italy are thought to have delayed and reduced the value of the order. When the UK ordered 22 transport versions in March, It admitted the order cost £300m more than US helicopters. Development costs of more than \$3bn have been split equally between the British and Italian governments. Westland and Agusta both hope for exports to the Middle East. Bernard Gray, Defence Correspondent

Hungarian minister quits

Hungary's labour minister, Ms Magda Kovacs Kosa, a leading member of the ruling Socialist party and a former communist-era union leader, has resigned following criticism of government decisions by the constitutional court.

m recen elements of a deeply unpopular austerity package aimed at cutting government spending and welfare. The package has already led to the departure of three other ministers.

Government officials said Mr Gyula Horn, prime minister, would ask Ms Kovacs Kosa, considered one of the cabinet's most experienced and able performers, to reconsider. Analysts said her departure would further increase pressure on Mr Horn, who is under attack from many in the party for abandoning socialist principles and for making too many concessions to the Free Democrats, the liberal junior coalition Virginia Marsh, Budapesi

Spanish shipyard jobs cut deal

Union and government negotiators in Spain reached a settlement on cuts affecting 3,900 shipyard jobs yesterday, promising to end a bitter three-month conflict. The two main trade unions agreed to the revised scheme after obtaining favourable terms for early retirement.

Three smaller unions are doe to decide in the oext few days whether to back the deal. Management at the loss-making state-owned shipyards initially proposed axing 5,200 of the 10,000 jobs, closing two facilities in Cadiz and Seville and privatising three others in northern Spain.

But the scheme was watered down after violent protests in Andalucia and strong opposition from the socialist regional government. The viahility plan, which requires European Commission approval, aims to make Spanish yards

competitive by 1998, when state subsidies are due to end. It is the government's third attempt since 1984 to set the shipyards on an even keel, and will bring the total of jobs lost David White, Madrid

Ecuador impeachment bid fails

Ecuador's vice president, Mr Alberto Dahik, was acquitted of corruption charges yesterday after four days of impeachment hearings. Only 39 of 77 congressmen voted in favour of impeaching Mr Dahik, far short of the two-thirds necessary. The principal support for Mr Dahik came from his conservative party, the Populist PRE Party, and independent congressmen. The vice president was accused of having bribed judges and legislators to see through the government's economic reform programme. Raymond Colitt, Quito

Donors may follow US in cutting contributions to soft loan fund

World Bank fears cash shortfall

By George Graham in Washington

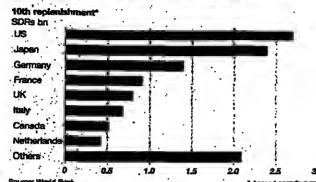

World Bank plans to ask donor countries for \$13bn (£8.3bn) to top up its soft loan fund for the next three years amid

severe doubts about the willingness of donors to provide Faced with the certainty of a sharply reduced US contribution, Bank officials are trying to draw up a scheme they hope to finalise in Luxembourg next month that will prevent other

countries from slashing donations by the same proportion. Senior finance ministry officials are to meet in Washington next Thursday to discuss the 11th replenishment of the international Development Association, the World Bank arm which lends at 0.5 per cent

interest to the poorest nations. One day earlier, delegates from the US Senate and House of Representatives will meet to draw up a compromise foreign aid budget for the next 12 months. The best the Clinton administration officials bope for from this meeting is a payment of \$775m towards the US pledge for the current round of

international Development Association

IDA, known as IDA-10. That would leave the US \$933m in arrears on its current IDA promises and the prospects of further commitment to IDA-11

World Bank officials have surveyed the borrowing needs of the 76 countries with incomes below \$865 a head eligihle to borrow from IDA and estimate they will need 15.3bn special drawing rights (£14.43hn) over the three years from July 1 next year.

But about SDR6.3bn can be found from money carried over from the current IDA round, Bank profits and repayments on earlier IDA loans.

found from donors, a sharp reduction from the SDR12.5bn raised in the 10th IDA replenishment three years ago.

Eveo if the US gives no money at all, other donor countries could still meet this total with lower pledges than they made in 1992 But IDA countries have

always insisted on applying a strict hurden-sharing formula. Under this, the US share would he roughly \$2.75bn, a figure no one regards as even remotely achievable. "The question is: how do you balance the desire for hurden-sharing with the desire for SDR9bn?" said a

MA promises, other donors set up a parallel fund which lent for the same purposes but barred US companies from henefiting from procurement contracts in the projects it financed. IDA is again looking at a similar scheme. IDA is oot the only soft loan

window to be feeling the US budget squeeze. Soft loans are particularly important for a dozen heavily indebted low-income countries in Africa and Latin America which cannot afford to take on market rate deht which they cannot service. But neither House oor Senate has allocated any money at all to the IMF's Enhanced Structural Adjustment Facility or to the African Development Bank's soft loan fund. Some money is earmarked for the Asian Development Fund, but not enough to clear the US's \$430m of arrears.

Soft loan funds have suffered twice over because others have scaled back contributions in proportion to the US shortfall. Germany and Canada have done so for IDA, and a much longer list of mostly European countries have withheld \$470m from the Asian fund, which Mr Mitsuo Sato, the ADB's president says looks likely to run out of money next year.

Daiwa 'misled' US regulators

By Gerard Baker in Tokyo and

Daiwa Bank's problems trade, but it continued to operdeepened yesterday with fresh ate a dealing room there for a allegations about its \$1.1hn further seven years.

(£710m) loss in alleged frauduWhen US officials discovered lent bond trading at its New York hranch, Bank officials refused to confirm reports that the company's employees in the US had deliberately misled regulators when the New York offices were inspected in the

early 1990s. Kyodo, the Japanese news agency, also reported last night that Mr Akira Fujlta, the Daiwa Bank president, and Mr Sumio Abekawa, the bank's chairman, would formally announce their resignations on Monday to take responsibility for the bood losses.

According to Japanese newspaper reports, attributed to Daiwa employees, the bank temporarily moved several of its bond traders and some of its financial accounts shortly before an on-the-spot inspaction of its local operations by the New York Federal Reserve in November 1992.

The staff, including Mr Toshihide lguchi, who was charged last week in connection with the losses, were said to be moved from the bank's downtown Manhattan office to its midtown branch. The bank had been under pressura to split its bond trading and bond custody operations, as it had repeatedly promised to do.

The failure to separate the two offices was crucial in allowing Mr Iguchi to conceal his loss-making trades for a period of 11 years from 1984. As long ago as 1986, the reports said the bank told New York office would only keep records of transactions and would not

the dual operation at the downtown office they immediately demanded that it be split. In charges published on Monday, the Federal Reserve said that it and the superintendent of the New York state hanking department "were led to believe by Mr Iguchi and other officials at the New Yurk branch that lines of authority were changed in November 1993 so that lguchi was no lon-ger responsible for both the hranch's trading and custodial

But, the charges said, the authoritles have "reasonable cause to believe" that those reporting lines were not

the time.

Business over 38 bottles of sake

Japanese taxpayers are shocked by the cost of entertaining officials

he lights in Ginza and Akasaka, two of Tokyo's famous night spots. have dimmed as Japan's recession has taken a toll on corporate entertainment. But the tightening of the private sector purse appears to have had little effect on government officials, who have been lavishly wining and dining one another

at public expense. Cultivating central government contacts is part of the job description of local government officials, hut the Japanese public has concluded that their enthusiasm for the work goes beyond the call of duty. Taxpayers have heen shocked by the discovery that their money is going into huying meals of costly crah, wine at Y33,000 (£210) a bottle, and

operations". an evening out with escorts at Y20,000 a sitting. Much of the entertaining is of officials at ministries which allocate public works projects and other Daiwa Bank's headquarters

in Japan are said to have conducted an internal investigation of the branch in November 1993 and to have discovered the deception. They then informed the New York authorities of the failure to comply with the Fed's instructions. Senior local officers of the bank were reprimanded at

If confirmed, the reports will prove deeply embarrassing to Daiwa, since they suggest a lack of management control by the bank's head office in Osaka of one of its most important overseas branches. They are likely to prompt intensified supervision of Japanese banks' overseas branches and subsidiaries by regulators around the

The Tokyo office of Wakayama prefecture spends much time wooing officials at the ministry of agriculture, forestry and fisheries, and the amount of entertaining that ministry of construction. Offi- goes on by public servants of Mr Tetsundo lwakuni, former cials from the two ministries, other public servants seems mayor of Idzumo. useful for a somewhat remote excessive. useful for a somewhat remote prefecture in western Japan dependent on fishing and for-

estry, were entertained on a total of 90 occasions in fiscal 1993 at a cost of Y9.8m. The prefectural government of Miyagi, in northern Japan, has admitted that it spent Y888.9m on food In 1993. of which at least Y360m was spent on entertaining central government and other local

government officials. In many cases, the funds used to pay for these evening sessions come from so-called "food costs", provided to local governments as part of public works subsidies to cover such expenses as the cost of serving tea and cakes at meetings. Even in Japan, where close

personal relationships are valued highly in all corners of life, and after hours drinking is for many a daily routine, the

Citizens' groups, which triggered the controversy, say the entertaining of hureaucrats does not end in the restaurant hut goes on to bars, night clubs and beyond. On one occasion, a party of four dining at the expense of the Tokyo office of Akita prefecture emptied 38 bottles of sake.

Local government officials protest that such consumption is a crucial part of their job. "The ombudsmeo have beeo very critical, but in Japan such entertaining has a beoeficial role to play," says Mr Tetsuo Enamiya, director of the Tokyo office of Kochi Prefecture.

Others argue that the real problem lies not so much in the entertaining but in the con-

centration of power in Tokyo. "In a country where power is concentrated in the central government, this kind of public eotertaining is required," says

Although Mr Enamlya admits clearer guidelines and financial limits need to be placed on the entertainment of central bureaucrats, he points out that for officials from a faraway region, taking them out is an effective way to convey the prefecture's needs to the central government.

"It is oot possible to do this just by exchanging business cards. Things that might take 10 days for us to accomplish can be dooe in just two or three hours. "We do not wine and dine bureaucrats, sacrificing family life and at the risk of ruining our health because we want to, hut because we believe it works," be says.

MINISTER

By William Dawkins and Kyodo in Tokyo

The Japanese justice minister, Mr obaru Tazawa, is expected to resign by Monday in the wake of press accusations of failing to disclose a loan

from a religious group.

Mr Tazawa has denied trying to cover up the receipt of Y200m (£1.3m) from Rissho Koseikai, a Buddhist organisation which supports the Liberal Democratic party, of which the minister is a member. The organisation says the loan was fully repaid. The revelation that a government minister borrowed money from a Buddhist group is an embarrassment to

the ruling coalition, as it is struggling to

obtain parliamentary approval for a proposed law to tighteo official regulation of religions. The draft law is intended to avoid

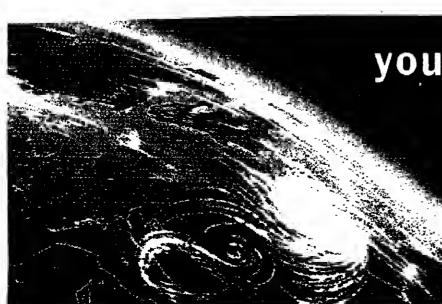

repetitions of the tragedy allegedly wrought hy Aum Shinrikyo, a mystical sect which is believed to have carried oot the nerve gas attacks on the Tokyo subway last March, in which 12 people died. The cult's spokesman and de facto leader, Mr Fumihiro Joyu, was arrested early today.

However, other more respectable religions, some of which play an important part in national politics, believe the proposal is also against their interests. It has aroused protests from the opposition New Frontier party, which

benefits from the backing of Soka Gakkai, far larger and more powerful than Rissho Koseikai. The law bas split the LDP religious and non-religious members and exposed the complex, sometimes uncomfortable, relationship between politics and religion in Japan.

Mr Tazawa denied allegatious that be had asked the political opposition not to ask a parliamentary question about the loan, in return for a promise to vote against the religious law.

Officially, the Japanese constitution bans religious from exercising political authority. But in practice, any politician able to win endorsement from a powerful religious group snch as Soka Gakkai ls almost guaranteed electoral victory.

Fraud office to block suit against Leeson

The UK Serious Fraud Office is attempt by Barings Bank bondholders to bring a private prosecution in the UK courts

against Mr Nick Leeson, the former trader responsible for the bank's collapse, John Mason and Nicholas Denton write. The SFO, which has always supported the principle that Mr Leeson should face

trial in Singapore rather than Britain, yesterday took over the bondholders' prosecution and said it would seek to have summonses issued against Mr Leeson withdrawn.

The move prompted an angry response from the bondholders who accused the SFO of abusing its powers. The bondholders, who lost £100m (\$158m) in the Barings collapse, are now considering bringing a judicial review in the High Court in London in an attempt to reverse the

SFO's decision. Mr Jonathan Stone, chairman of the Barings Perpetual Noteholders Action Group, said: "There must be some kind of ulterior motive. This is tha state meddling with the law of the land in a way that is wholly unsatisfactory."

The power of state prosecutors to take over private prose-cutions was intended to prevent frivolous cases coming to court and should not bave been used in the bondholders' case, be said. The SFO defended its move.

saying: "The director of the SFO considers it is not in the public interest for there to be a prosecution of Mr Leeson in the UK in the present circum-

It refused to enlarge on the statement or comment on the bondholders' reaction. However, it has consistently main-tained that Singapore is the most appropriate place for Mr Leeson, who remains in jail in Frankfurt, to stand trial. SFO sources have previously pointed to both the legal and

diplomatic problams involved in opposing Singapore's appli-cation to extradite Mr Leeson from Germany.
The bondholders' action

began last week when City of London magistrates issued eight summonses against Mr Leeson, accusing him of false accounting and obtaining money by deception. The SFO will appear in the same court next Tuesday to ask for the summonses to be withdrawn. Singapore's extradition request was approved earlier

this week by a German court. However, further appeals by Mr Leeson's lawyers could delay any extradition.

To avoid prejndicing the extradition proceedings, the Singapore government bas delayed publication of the report by inapectors it appointed to investigate the collapse of Barings. Their findings, which are expected to implicate senior Barings executives, have been with tha Singapore finance ministry since being presented a month ago.

Opera in cash plea to avoid

industry gloomy over recovery

addington

Further evidence of a slowdown in the pace of the export-led recovery is expected to be reported next week by construction industry leaders who have become increasingly alarmed at the steep decline in the sector's prospects. Separate industry surveys will stress the low level of investment by industrial and commercial companies. A further deterioration in construction prospects over the summer has prompted the National Council of Building Material Producers to reduce sharply output forecasts to be published on Tuesday. The council, which in July had forecast a 212 per cent rise in industry output next year, now predicts a small fall. Forecasts of a 2 per cent output fall this year have been left unchanged. The council, which represents 2,000 companies, is also expected to report a decline in the pace of building material export growth.

A separate survey, to be published on Monday by the Building Employers Confederation, will emphasise the current low level of investment by industrial and commercial companies. It says investment by industrial and commercial companies. It says investment by industry in previous economic recoveries has been far higher at this point in the cycle.

Andrew Taylor, Construction Correspondent

Manufacturers boost output

Manufacturers stepped up their production in August, revers ing the drop in output seen in July, official figures show. But while car manufacturers, computing and soft drinks raised production, other sectors such as machine tools and pharmaproduction, other sectors such as machine wors and pharma-ceuticals reported declining activity. The figures highlighted the confusing trends that are buffeting the economy as it comes to the end of its third year of recovery. Although manufacturing expanded strongly last year, it slowed earlier this year amid slower export growth. Some City economists concluded from yesterday's data that business was now bouncing back from weaker levels of demand in the summer.

Rescue urged for betting shops

Only Government intervention can save 2,400 betting shops and 7,400 jobs because of the impact of the National Lottery and especially its scratch cards. A report from the Henley Centre, the consultancy group, predicts that profits in betting sbops this year will be down 35 per cent on 1994. Henley believes the indus-THE NATIONAL try is likely to lose 100m individual bets this year. Overall the UK has 9.300 betting shops which employ directly 40,000 people. The consultancy group says the solution is to reduce the rate of betting duty from 7.75 per cent to 5.75 per ceot, "a level which would put betting approximately on a taxation par with the lottery".

Tory evangelist hunts for gaps in opposition rhetoric

The British Labour party has never had it so good. The lead-ership won every vote at this week's annual conference, and leader Tony Blair's sermon from the podium presented tha party as patriotic, the propo-nent of Christian values and the unifier of a jaded and

divided United Kingdom. Mucb of the responsibility for determining whether the Conservatives can fight back effectively at their conference next week rests with Mr Brian Mawhinney, a former member of the Protestant Church of England's General Synod who bas been Conservative party

chairman since July. Mr Mawhinney, an Ulsterman with an evangelist's fer-vour, described his mission as exposing the "gap hetween New Labour and the reality of Real Labour in terms of what it does wheo its hands are on the levers of power".

Mr Mawhinney said Labour's conference showed an increasingly apparent "gap between the rhetoric and the reality." Mr Blair is acutely aware that

his woolly commitment that there would be "a publicly owned and publicly accountable railway system under a Labour government", while insisting this was not a "blank cheque" to buy back any priva-

tised part of the railways.

The Tories have exploited a similar contradiction over the past few days in Labour's plan to levy a £3hn (\$4.74bn) windfall tax on water and electric-ity utilities while announcing a partnership with another quasi-monopolist, British Telecommunications, to develop a national information super-

highway. Another opportunity for the Tories is Mr Blair's attempt to distance himself from the trade unions and his insistence that they will not receive special favours from a Labour government. But they do have a privileged place within the party's structure - and Mr Mawhinney

is there to point it out. A more serious weakness is the charge that power without responsibility is being wielded by a new group within the Labour party: the famed "spin doctors" who are Mr Blair's

The issue is particularly fer-tile ground for Mr Mawhinney,

since some leading Labour politicians are concerned about by Mr Peter Mandelson, a Labour whip and intimate of the Labour leader, and Mr Alastair Campbell, Mr Blair's press secretary. Many journalists can also tell a heartfelt tale of being obstructed by Labour press advisers when preparing articles damaging to Labour.

Newspapers reported gleefully last week that faxes had been sent by Mr Campbell to ITN and the BBC, urging them to weigh up carefully whether the verdict in the O.J. Simpson trial was a more important news item than Mr Blair's conference speech. Since the BBC did give prominence to Mr Blair's speech, while ITN and most newspapers led oo the trial, the implication of most reports was that the BBC had succumbed to the pressure,

though the BBC denies this. Elections are not usually won, bowever, on negative campaigning alone. Mr Mawhinney said the Tory conference would also lay the

Labour party conference Unexpected backing comes from a former Thatcher minister

Cable row cools white heat of technology

By Kevin Brown, Chief Political Correspondent

Mr Tony Blatr, leader of the opposition Lahour party, appeared to have pulled off a major coup with his announcement to the party conference this week of a fibre optic caming agreement with British Telecommunications.

Polltically, the announcement fitted neatly with Mr Blair's determination to build hridges with big husiness as he recasts the formerly leftwing party in the mould of its Euronean social democratic counterparts.

The "deal" was simple. A Labour government would phase out a ban on transmission by BT of entertainment programmes by cable - a restriction imposed by the Conservative government that effectively bars BT from the broadband communications

market. In return, BT would connect every school, hospital, library and college in the country at its own expense. By 2002, BT would be able to compete without restrictions with the cable companies that hold franchises to transmit entertainment.

Mr Blair's speecb was received rapturously by party delegates, desperate for power after 16 years in opposition. Cleverly, the market-orientated agreement was delivered as part of an intensely patriotic

Business envoys proposed: Leading business people could be recruited by a Labour government as ambassadors or senior diplomats to countries involved in trade with the UK, Mr Robin Cook, the shadow foreign secretary, said yesterday, Kevin Brown writes. Mr Cook has made no secret of his belief that British embassies could do more to boost UK trade. "As foreign secretary, I will want to find ont whether there are people in British industry with experience and success in exports who

By Jim Kelly, Accountancy Correspondent

Touche Ross, the accountancy firm which acts as liquidator to the col-lapsed Bank of Credit and Commerce International, has secretly cut its once crippling claim against the bank's auditors.

Price Waterbouse, the UK's fifth

largest firm, faced a claim of between

\$3bn and \$4bn over the failure of the bank. It is understood that Touche

Ross has now put forward a figure of

with liabilities of about \$10bn following the discovery of the world's bigest banking fraud. Initial estimates of the claim had put it close to the total size of the loss.

in July this year Mr Ian Brindle. senior partner at Price Waterhouse, told partners that the claim now stood at \$3bn to \$4bn and represented a "major retreat" on the part of the liquidators. He added, in a confidential memo, that if the case was pressed to court the trial would not take place "until the turn of the cen-\$250m. BCCI was shut down in 1991 tury". Yesterday Price Waterhouse declined to comment on the latest reduction in the claim.

Price Waterhouse is alleged to have failed to detect or report financial irregularities at the bank. The firm is expected to reject the new claim

which would still represent the biggest auch payment. The moves come during a period of intense activity between the parties involved in the collapse of BCCL On October 20 a court in Luxembourg will begin to hear objections to the

global settlement for the bank's 90,000

The settlement, put forward by Touche Ross, is based on a payment of \$1.8bn from the Abu Dhabi government, BCCI's principal shareholder. An initial \$1.55bn would be available on the successful completion of the

court process. Four former employees, linked to the BCCI Campaign Committee, have delayed the settlement by lodging an appeal. Yesterday they indicated that talks were under way with Touche Ross about settling their dispute. Mr Mohammed Qayyum said that 15 1995 liquidators' fee "intensive exchanges" were taking and legal fees £347,000.

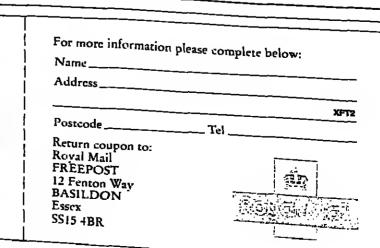

place to settle several outstanding dis-putes. Touche Ross declined to com-

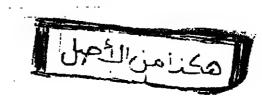

While the employees' claim that "the liquidators are trying for a settlement" opens up the prospect of an early payout to creditors, it is understood that several significant barriers

still remain to an agreement Meanwhile, It is understood that up to June this year liquidators' fees were £115m (\$180m) and legal fees had reached £45m. For the month to June 15 1995 liquidators' fees were £1.04m

Although it created two integrated companies in Scotland. it was widely assumed that it would hlock generators from buying distribution companies sonth of the border. But the government's deci-

sion not to refer Scottish Power's bid for Manweb was swiftly followed by bids from National Power and PowerGen for two of the distribution comnanies, Southern Electric and Midlands Electricity

If these hids are cleared, the ndustry will have three large integrated companies, which will be joined by a fourth -Hanson's Eastern Group subsidiary - if its hid for £1bn of National Power stations is sucessful. The regulatory system was

kind to Scottish Power in another way. Speculation that the bid would be referred to the Monopolies Commission depressed Manweb's share price, allowing Scottish Power to buy shares in the market. By the time the hid was cleared, Scottish Power had accumulated a 14,9 per cent stake in the target. Although Manweh's shares jumped on the news they remained close to the Scottish offer price,

to 28 per cent hy yesterday Manweh's advisers claim

allowing it to take the bolding

Ian Rohinson, chief executive (left) and Ian Russell, finance director of Scottish Power: breaking new ground

that the early stake was critical. "It really put off potential counter-bidders who were loath to enter an auction when Scottish was already in such a strong position," said one.

That in turn increased Scottish Power's perceived chances of winning, which weakened the sbare price. It was a vicious circle."

Manweb managed to interest PacifiCorp, a US utility based in Oregon, in making a counter offer. But it claims that Pacifi-Corp pulled out because it feared that if it made an offer it would merely be topped by Scottish Power.

Other sources suggest that PacifiCorp thought Scottish Power's bid valued Manweb fairly, and that the Americans decided to shift their attention

to opportunities in Australia. PacifiCorp finally pulled out only last Thursday, which made life difficult for both sides, it was only then that Manweh started its last round of institutional presentations, which its advisers now feel may bave left it too little

Scottish Power also feels it. suffered, since the presence of the potential white knight stopped private investors from sending in their acceptances. It thinks that many intended to accept but never got around to

advertising in the final days of the bid, Scottish Power persuaded 30,000 of Manweh's 110,000 private investors to

Had Scottish Power lost, it would have laid the blame on its actions on the weekend of September 16 and 17. On the previous Friday, Manweb had announced a defence package which promised shareholders a collection of special dividends and preference shares worth 550p a share.

Scottish Power decided it would increase its original 915p cash offer and on Saturday its adviser, Baring Brothers, con-tacted Schroders, Manweb's merchant bank, to ask for a

rom the response Scottish Power judged that there was no chance of getting a recommendation from Manweb at a price it would be prepared to pay, so on Monday it announced tts new offer of 975p.

But the two sides may not have been that far apart. "Scottish Power might have got a recommendation for another 30p or 40p, which they probawould have thought worth says one close observer. "In the end, of course, they were right. But they cut it pretty

Jourdan warns on full year

Shares in Thomas Jourdan fell 10 per cent to 32p yesterday after the consumer products group warned that full-year profits would be hit by a combination of disappointing trading and non-recurring charges

Kleinwort Benson, the company's broker, cut its pre-tax profit forecast for the year to December 31 from £900,000 to £100,000.

The profit warning comes just three weeks after the company reported a recovery in lts business, cutting halfyear losses from £4.41m to occupied by the company with £199.000. Mr Keith Whitten, chairman.

the statement of the state

William Same and the

Higher prices for most metals than a year ago belped more than double pre-tax profits at Outokumpu, the Finnish mining and metals group, in the first eight months of the year. Pre-tax profits jumped from FM557m to FM1.3bu (\$303) as economic growth and enhanced investment lifted metals consumption.
Outokumpu, which has suffered from capacity constraints, is in the middle of an expansion programme which will

increase its copper smelting and refining capacity and nickel output by about 75 per cent by the end of this year.
Cost-efficient capacity introduced this year in copper and
nickel production and expanded steel melting due to come on
stream at the end of the year would boost efficiency. Group sales in the eight months rose from FM10.9bn to FM11.15bn, producing operating profits of FM1.35bn. compared with Hugh Carnegy, Stockholm. FM628m a year ago.

Michelin to build more plants

Michelin, the French tyre maker, is to build two extra production units in France, both of which are expected to use the company's new C3M process. The process is so far being used at only one plant, the group's Clermont-Ferrand beginning to control France Michelin court the control france. headquarters in central France. Michelin says the secret process allows significant improvements in productivity and

efficiency and enables greater flexibility of production. One of the new units is to be built at Clermont Ferrand. Work has already started and is due to be completed in one year. The other unit is at Saint-Priest, near Lyon. The company said it wanted to avoid a significant rise in capacity. which could damage margins in the industry. The new units were aimed at nicbe markets and at increasing flexibility of

Schneider ahead at halfway Schneider, the French electrical equipment maker, lifted

first-half net profit by 15 per cent to FF7397m (\$\$0m). and repeated predictions that full-year results would improve sharply. First-half operating profit advanced 17.4 per cent from a year earlier to FFr1.74bn while one-time losses were FFr76m. compared with a gain of FFr12m a year ago. The company reported a 6.6 per cent rise in first-half sales to FFr29,19bn. Sales at Schneider Electric, the main division of the group,

rose 9.2 per cent on a constant structure basis to FFr20.8bn while operating profit rose 22 per cent. Spie Batignolles, the troubled construction unit. managed an operating profit of FFr59m and broke even on a net basis, the company said. Schneider warned that the first balf's strong sales growth AP-DJ. Paris. would ease in the second half.

Baloise shake-up pays off

Baloise Insurance, Switzerland's fourth largest insurance group, reported a 15.9 per cent jump in first half consolidated net income to SFr95.8m (\$83.4m), caused mainly by restructuring in its non-life business. The group, the first Swiss insurer to publish complete consolidated interim accounts, said it expected full year net income to be more than 10 per cent above last year's SFr135.3m.

Premium income in the first half was up 4.5 per cent to SFr4.12bn, with non-life business flat at SFr1.78bn and life business up 11 per cent to SFr2.04bn. Assumed reinsurance was down 7.1 per cent to SFr292.7m. The claims ratio on the non-life side eased from 76 per cent to 72 per cent, belping boost its pre-tax profit by a third to SFr86.9m. Pre-tax profit on the life business was flat at SFr33.1m. In the expectation of improving stock market prices, the group postponed the Ion Rodger. Zurich. planned realisation of capital gains.

to split generation from distribution

By Richard Waters in New York

Nlagara Mohawk, an electric utility which serves a large part of northern New York atate, yesterday proposed to break itself in half hy separating its power generation from its distribution businesses.

The move is one of the most radical yet proposed by a US electric utility in the face of growing pressures from creeping deregulation of the country'a electricity markets. Mr William Davis, chairman,

said the company had been hamstrung by regulations which bad resulted in high prices for its L5m customers. In particular, he said, Niagara Mobawk had been required to buy electricity

from other generators at unrealistically high prices, causing rising prices for consumers at a time when there was an oversupply of power. Under yesterday's proposal, which needs the approval of New York state regulators among others, the market for electricity in Niagara Mohawk's 24,000-square mile

service area would be thrown

open. The company's power

generation business would

then compete for customers with other suppliers. The regulated distribution business would remain in a separate

The reorganisation would depend in part on the company being allowed to renegotiate its contracts with other generators, under which it is required to pay \$1bn this year.

If completed, the plan would also force Niagara Mohawk and many of its suppliers to take big asset write-downs to reflect the newly competitive nature of their market.

The company's proposal is the latest indication of how a separation of generation and distribution, similar to that in the UK, seen as a possible model for the US electricity industry. Southern Company, the Georgia-based company which this year agreed to buy South Western Electricity, the UK distributor, said it expected its experience of the UK market to help it prepare for com-

petition at home. Niagara Mohawk said that, if its proposal were carried out. prices to residential and commercial customers "could be frozen for five years". Otherwise, it would have to levy "substantial increases"

US electric utility | Coles Myer seeks more time

"Yannon transaction" bave

Mr Solomon Lew, the embattled chairman of Coles Myer, Australia's largest retailer, aald yesterday it would take time to resolve the group's boardroom structure and corporate governance, and that "hasty short-term decisions will not necessarily be in the best of interests of all shareholders".

commonality of components.

Mr Lew was responding, in a formal letter to the Australian Stock Exchange, to intense speculation that Coles would announced a revamped board structure this week.

Recent disclosures about the non-executive directors.

brought aimmering disqulet over Coles' corporate governance standards to the surface. The Yannon transaction was a complex deal which stemmed from the company's desire to keep a tranche of "loose" shares out of potential predators' hands, and ended up costing the company A\$18m (US\$13.7m) while benefitting interests associated with Mr

Lew by a like amount Institutional investors have been urging a boardroom revamp, including the appointment of an independent nonexecutive chairman, and new

changes, particularly since he adds that "the views of major investors are important but are not necessarily representative of the company's entire share register, including its 140,000 individual shareholders". Meanwhile, Coles won an

interim injunction preventing the Australian Securities Commission - which is investigating the Yannon matter - from enforcing about a dozen notices served on the retailer seeking more information until the matter can be heard on

RWE pays increased dividend

By Judy Dempsey in Berlin

RWE, Germany's largest utility group, is to increase its dividend by DM1 tn DM14 after recording an 18 per cent rise in net profit for the year ending June 30, its supervisory board announced yesterday.

Profits rose from DM922m in the previous year to DM1.06bn (\$755m) while group sales increased from DM55.7bn to DM63.6bn. Earnings per share increased from DM22.70 to DM26.80 over the same period. Last year, RWE paid a dividend of DM13, but added a bonus of DML

The complete divisional breakdown will not be disclosed until next month; however provisional figures show that the electricity division will have contributed 34.1 per cent of total sales but more than 56 per cent of total prof-

Provisional results also show that the oil, petrol and chemicals sector, which make up 37.I per cent of turnover, continues to be the largest contributor to sales, followed by the electric-ity sector, then mechanical and plant engineering at 10.3 per cent and mining and raw mate-

The markets, however, will be monitoring the growth of RWE's telecommunications division. RWE last month pulled out of the CNI Communications Network International, a consortium previously headed by Mannesmann Eurokom. RWE and Deutsche Bank, RWE said it would instead focus increasingly on extending its

own network. Mr Dietmar Kuhnt, RWE chairman, recently said RWE would, by 2000, "have sales of DM2bn DM5bn from this [telecommunications] sector". This between DM2bn and DM4bn.

COMPANY NEWS: UK

The acquisition of the Ritz has put the Barclay brothers back in the spotlight. Have they paid too much?

Potential in a famous name

By Nicholas Lander

During London's long hot summer, lunch or dinner at The Ritz overlooking Green Park was a welcome relief. Since signing a management contract to run The Ritz in

May 1994, general manager Brian Williams, chef David Nicholls and the rest of the team from the Mandarin Group, until then best known for its hotels in east Asia, have raised the level of service and food to match what is one of London's prettiest dining

In came fixed price menus and sensibly priced wines although there were still a couple of 1949 clarets at £650 each and Mr Williams' mission statement that guests must be able to "stroll in for lunch at 12.30 and have the bill on their table by 2pm".

However, what they have not been able to rectify are the surroundings you have to pass to reach The Ritz, still the finest name in the hotel industry

lunch table you have to pass shops selling discounted Timberland boots, a row of phnne booths full of prostitutes' calling cards and a bus stop offering tourists trips around Lon-This is not quite the setting

guests expect when asked to pay £250 a night for a room. And certainly The Ritz's main competitors, The Savoy, The Dorchester and The Lanesborough, offer much more discreet entrances for the discerning businessman or the rock'n'roll star escaping his fans.

Nor, despite its imposing interiors, has The Ritz been able to offer today's travellers exactly what they want. Gyms. swimming pools and business centres were not what César Ritz had in mind in 1906. But Mr Williams knows that this is what is expected in top class

botels today.

Over the past year Mr Williams bas closed The Ritz's in-house laundry and sold £100,000 of wine to free space and cash to introduce such

needed capital expenditure programme. Whether Mr Williams and

the Mandarin Group will be in a position to execute these plans is unclear. Although be declared himself excited on bearing of the hotel's new owners, he said the future of the management contract would depend on them. Whoever finances and exe-

cutes the plans, there is little doubt among London's senior hotel managers that the Barclay brothers have not only bought themselves the finest name in hotels, but also a potentially lucrative merchandising business.

According to David Broad-head of the Savoy Hotel group, The Ritz needs at least £20m spending on it and his only disappointment is that until today the Barclays used to stay at Claridge's, part of the Savoy group, and itself undergoing £16m of renovations. However, according to David

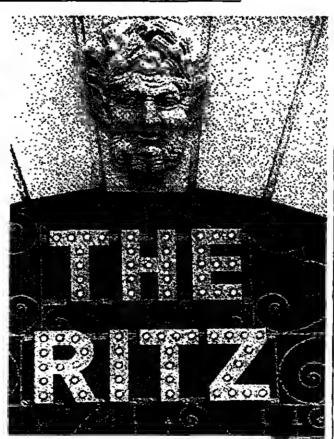

Levin, proprietor of London's Capital Hotel in Knightsbridge, even allowing for the £20m for

renovations, The Ritz may have come cheap. "When I last heard that The Ritz was for sale 18 months ago, I inquired about the price and was told that no offers were being considered under £100m.

"What is exciting for the new owners - and for anyone who cares for The Ritz which has been neglected for decades - is that Eagle House, the building next door on Arlington Street, is for sale. If the Barclay brothers could buy that, they would be able to transform the whole hotel.

"The Ritz would then have a wonderful, imposing entrance, about 175 bedrooms (at the moment there are only 115] and a terrific restaurant overlooking the park. Around the hotel, on two sides, you'd be able to create a stunning arcade of shops."
Finally, said Mr Levin, the

Ritz name could be lent to a range of luxury goods. "Ritz soap, sheets, fragrances even a Ritz School of Cooking - they are all waiting to happen.

Reclusive twins' privacy Impeccable connections their most valuable asset given a premium rating

By Raymond Snoddy

The new owners of the Ritz, the Barclay Brothers, gave a was October 1983 and a Sunday Telegraph journalist, Stella Shamoon, was lunched by David and Frederick at their flagship Howard Hotel on the London Embankment. They were prepared to break the habit of a lifetime because they were obviously pleased with themselves for managing to buy Ellerman Lines, the shipping and brewery com-

In one of the select few quotes attributed to a Barclay brother, David Barclay explained in the 1983 interview: "We went into the prop-erty crisis in good shape and like others we got hit – but we survived."

pany, from the even mnre

UK with estimated worth of

If they are successful they

The Barclay Brothers are admirers of Lady Thatcher and investors in Sir Tim Bell, her clearly the more loquacious of long time adviser. They divide

their time between London and Monaco, and are in the process of building an elaborate mock-Gothic fortress on

the small Channel Island of

Brecohou The brothers trained originally as estate agents and moved into property, then into hotels, shipping and brewing. As businessmen, they tend to swoop unexpectedly on targets with the powerful weapon of

Last year's Barclay deal believed to be worth more than £200m - was the purchase of Automotive Financial Group, one of the UK'a biggest mntor retailers and then controlled by Mr Octav

Growing succesa has not made the brothers any more talkative. Except that David Barclay did break his silence to say: "Privacy is a valuable commodity. There is no incentive for us to talk about our

The Ritz Hotel, which has been sold by Trafalgar House for £75m, enjoyed an asset value far exceeding its Norwegian granite and Portland stone facade – it was a brand that became a byword for high society. Hoteliers and analysts said yesterday that

hotels with pedigrees built on royal patronage and famous goests were gaining value and could command premium prices. Mr Terry Holmes, general manager of the Stafford Hotel and former manager of the Ritz, said: "The property value of named hotels is riding high and we're at the truthe cycle, patternary in London." at the top the cycle, particularly in London."

The sale of the Ritz follows the disposal earher this year of the Regent Hotel to the Land-mark chain, which fetched about £70m, and of the Stafford - also owned by Trafalgar House -to Shire Inns for £16m. This aummer Rank Organisation withdrew from the industry after 28 years with the sale of the partly refurbished Royal Garden Hotel for an undisclosed sum. In New York, meanwhile, the Plaza Hotel has been sold for more than \$300m (£194m) to CDL Hotels of Singapore and Prince Abdulaziz al Saud of Saudi Arabia. The Waldorf Astoria

could also change hands shortly now that Hil-

ton Hotels Corporation has decided to demerge

its hotels arm from its casino operations.

Although such hotels were selling at premiums to asset values, the trend has been confined to only a few cities, according to Mr Greg Feebely, hotels analyst at Kleinwort Benson Securities. "It's far easier to sell upmarket botels in London and New York than in continental Europe," be said.

Ms Kay Dymock, lead partner at Jones Lang

Wcotton, the international estate agents which handled the Plaza transaction, echoes this view. She said: "The market in London and New York is very strong, which has been belped by high occupancy rates and the weakness of the pound and the dollar." One London botel being marketed by Jones Lang Wootton bas attracted more than 40 bids, many from south-east Asia. Christie & Co, which handled the Ritz deal said prices had been forced up by a shortage of quality botels on the market. According to Mr David Rugg, chairman, that had persuaded the owners of office blocks in London's High Holborn and St James's Park to convert commercial buildings into hotels.

By comparison, the market in Paris was said to be flat and some analysts claimed the Savoy to be lift and some analysis channed the savoy Hotel group was having difficulty selling the Lancaster Hotel, which has been on the market for more than a year. But the company said it was in advanced negotiations to sell the site and boped to announce a deal shortly.

Strong trading lifts Azlan shares 70p

By Jane Martinson

Shares in Azlan Group jumped 70p to a new high of 420p valuing it at £91.7m - as the distributor of network computer products reported strong trading ahead of its interims next month.

The group said pre-tax profits were expected to rise from £1.1m to more than £4m in the six months to September 30, on sales up 90 per cent to £72m (£37.7m). SBC Warburg, the bouse broker, is forecasting full-year profits of £6.5m. Much of the growth bas come from the group's expan-sion in Europe. While UK sales grew more than 36 per cent to

£34m in the half year, turnover in continental Europe, at more than £38m, topped that of the UK for the first time. Mr Christian Martin, chief executive, said: "Our strategy of developing value-added products and taking those net-

worked services around Europe has been extremely successful." At flotation almost two years ago, sales from continental Europe represented just 1 per cent of group turnover. Since then Azlan bas bought four companies and now operates in seven continental European

100 1994

countries, covering 80 per cent of the European network computing market.

Azlan's high-margin business includes the distribution of computing products for manufacturers such as Bay Networks, Cisco and IBM, as well as support services. The group intends to make

further acquisitions. "We will continue to grow our business so that the UK bas appropriate weighting in the European market," Mr Martin said. Azlan was floated at 230p. The share price plunged after a profits warning a year ago.

which was followed by management changes. **Derwent Valley placing** to fund £18m purchase

Derwent Valley, commercial property investor. has acquired 15 central London properties from the Co-opera-tive Insurance Society for

To fund the purchase, it is raising £20.6m by placing 7.76m sbares at 275p with institutions. The shares gained 2p to 303p yesterday. The placing is subject to clawback via a

1-for-4 open offer. Derwent reported pre tax profits of £1.55m (£3.77m) in the six months to June 30, a fall it attributed to lease expi-ries at the end of 1994 and refurbishment costs.

Mr John Burns, managing director, said the placing would reduce gearing from the "mid-eighties" per cent range "to the mid-sixties, which gives us room to buy some more".

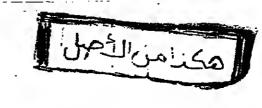

Gearing bad escalated in August, from 51.3 per cent at June 30, with the £31m purchase of six buildings from MEPC, the property group.
The 15 properties sold by the CIS have a combined floor area of 320 000 sq ft, extending Derwent's overall portfolio to more

than im sq ft. Over the last two years.

Derwent bas added a total of 30 properties, mainly in London's West End. to its portfolio at a cost of about

Mr Burns said the London property market had improved. There were opportunities "to increase the value of a number of properties prior to possible early disposal"

Net revenue from properties was £5.4m (£4.65m). Earnings per share fell to 4p (12.61p), although the interim dividend is raised to 1.73p (1.58p).

ously affected.

The G7 and the world

By 2004 tha countries still known as "developing" will generate a slightly larger share of total world output than those known, ever more inaccurately, as "industrial". This is the most intriguing fore-cast in the latest World Economic Outlook from the international Monetary Fund. The finance ministers and central bank governors of the group of seven leading industrial countries, meeting this weekend, may not remain masters

of their universe much longer. These figures exaggerate the international impact of developing countries. Nevertheless, the transformation under way must not be underestimated. One third of world exports go to developing countries. in developing countries. excluding oil exporters, the average ratio of trade to gross domes-tic product has also risen from 10 per cent of GDP in 1970 to just under 30 per cent last year, 10 percentage points higher than in industrial countries.

Net capital flows to developing countries averaged \$130bn a year during the 1990s, while 40 per cent of the net capital flows to Asian countries between 1989 and 1994 The level of direct investment is also, for obvious reasons, an excellent indicator of economic success. as is indicated by the contrast of Asia with Latin America, where more fickle portfolio capital domi-

nated these flows. Yet successful developing countries are far more dependent on domestic capital than on any inflow from abroad. One intriguing indicator is the depth of equity markets: in Chile, Korea, Malaysia. Mexico and Singapore, stock market capitalisation as a proportion of GDP exceeds that of Germany, France, or Italy.

Future prosperity

Mexico's mishap suggests this is no infallible sign of future prosperity. But high stock market capitalisations are another indicator of the spread of market economics. These changes are, dare one say it, more important for the future of Europe than whether a narrow monetary union is formed

Three observations suggest that these radical changes are unlikely to stop. First, the close correlation that used to exist between growth in industrial and developing coun-1990 and 1993 growth in developing countries increased sharply, in spite of the slowdown in industrial countries. The GDP of Asian developing countries is now forecast to expand by just under 50 per cent between 1990 and the end

Second, the Mexican crisis has proved no more than a brief hiatus. While the WEO's short-term

n a rain-drenched afternoon this week, Mr Tony O'Reilly, chief executive of the Heinz food group, cut the ribbon on a \$20m (£18m) baby food manufacturing plant in Geor-gievak, a town in the Stavropol region of southern Russia

The investment underlines bow important a market Heinz thinks political crises, economic depression and crima which still rack the country. "We believe Russia is rapidly oming a vibrant consumer society," Mr O'Reilly says. Heinz is just one of a wave of

western consumer products companies seeking to exploit the poten-tially incrative market provided by Russia's large and well-educated population of 150m.

These companies are trying to tap into the islands of relative affluence thrown np - primarily in urban areas - by the seismic shifts in the Russian economy as the military industrial base declines and the service sector expands. Increasingly, they are deciding to invest in Russia, rather than importing products from factories in other countries.

Russia's consumer revolution has touched every level of society, with Snickers chocolate bars and Abso-lut vodka on sale in even the remotest regions.

Many railway stations and sports atadia have been converted into vast flea markets to cater for the needs of the poorer end of the market. Thousands of private traders, who would have been condemned as apeculators in Soviet times, gather at weekends to bawk goods. At the top end of the market, glitzy supermarkets sell live lobster

and expensive French champagnes for the country's new rich. There are ready buyers for \$2,000 dresses in Russia'a shiny new fashion boutiques, and the latest Mercedes cars and stretch limousines now cruise Moscow's streets.

But what really attracts the west-

ern consumer products companies is the emergence of a prosperous middle class.

According to a study by McKinsey, the management consultants, at least 30 per cent of the population earns more than \$200 a month. Given the low costs of bousing, transport and energy - a legacy of communist days - a high proportion of this income is available for discretionary spending.

The middle class is chiefly clus-

tered in the big cities, which makes it easier to target potential customers. The Moscow region contains 11m consumers, representing a bigger concentration of people than in the Czech republic. St Petersburg, with more than 5m inhabitants, is larger than Slovakia. Denmark or the US state of Indiana.

Advertising boardings bave mushroomed in many cities to

ne of the many mysteries

about the Russian ecoo-omy is bow demand for

consumer goods appears

attract these consumers, adding colour to the grey urban landscape. Locally-produced television commerciala now burst out in the breaks in the Dynasty soap-opera serial. The circulation of the Russian edition of Cosmopolitan is one of the largest in the world, while other glossy magazines spring up seemingly every other day.

Newspapers advertise shopturi (shopping trips) to western countries allowing visitors to stock up with the latest western fashions. Late night bome-shopping programmes, such as Shop from your Sofa, which sells everything from

shoes, blanket Russian television. Heinz is aiming to ride this consumer wave and predicts its sales of locally produced baby food - as well as imported baked beans and sances - will rise from \$20m in 1996 to \$100m within three years, at which time it expects to break even on its investment.

Russia's prosperous middle classes are

To Russia with

baked beans

Western consumer products companies such as Philip Morris, Unilever, Procter & Gamble, Wella, L'Oréal, Coca-Cola and BAT Industries have been exporting increasinvesting in the country.

Mars, the privately-owned US foods company which was one of the first multinationals to move into Russia on a large scale, is already producing chocolate from a \$150m plant in Stupino, outside Moscow, Despite some setbacks, it still has plans to invest \$500m at the site to start manufacturing pet

foods, ice cream, and sances. Cadbury Schweppes is also committed to building a chocolate plant near St Petersburg while Nestlé has tling plant for Coca-Cola in Volgo-grad in southern Russia. Western retailers are also begin-

ning to take an interest in the Rusdeveloping a growing appetite for western consumer goods, says John Thornhill sian market, as shown by the steep rise in rents for prime retail space. Allied Domecq, which manufactures
Baskin Robbins ice cream, bas
opened 180 stores and distribution
points in Russia and is exploring the opportunities to open Dunkin

We are looking at three long-term developing markets which will have a big impact on fast food retailing in the future: India, China and Russia. But we are only investing \$30m in an ice cream plant in one of these countries. At the moment Russia is in the lead," says Mr Malcolm Wright, managing director of Allied Domecq's international retailing arm.

et the problems of operat-ing in Russia are legion. The growing strength of nationalism threatens to spark an anti-western backlash in the forthcoming parliamentary elections in December, with unpredictable consequences for foreign investors.

The tax and tariff regimes change with alarming regularity. Many joint venture companies bave experienced trouble with their Russian partners who are often more interested in spending profits today than in reinvesting for tomorrow.

Distribution of goods can also prove erratic and local trading monopolies are emerging in some regions, cutting the manufacturers margins. As bigb inflation bas raged in Russia, distributors have also stockpiled western goods, leading to volatile supply. Some consumer goods companies have had to withdraw and destroy food products as their expiry dates neared, or cut

supply as prices have fallen.

High-profile cash generative businesses, such as car dealerships and restaurants, are sometimes subject to violent attacks. One of the Brit-Isb-style John Bull pubs, partowned by Allied Domecq, was damaged in a bomb attack earlier this year. The company will say only that the incident was the result of an unrelated dispute between its Russian partner and a third party.

Western companies can find it hard to adjust to local conditions, cultures, and mentalities, Russians laughed at the advertisements for Wash and Go shampoo: the transliteration of "Vosb" means beadlouse.

"Russia is a land of contradictions," says Ms Nikka von Liemandt, a marketing manager for Mars. "In some senses it is a very developed market but it bas very had infrastructure. There is buge demand for consumer goods but it is becoming increasingly discerning. Unless you try to understand all these peculiarities, your business will fall by the wayside."

ing volumes of goods to Russla since the collapse of the communist bought a 49 per cent stake in a manufacturing enterprise in system. They are now growing Samara Last month, Inchcape, the increasingly aggressive about UK services group, opened a bot-Statistical game of roulette

The official figures give some indication of the scale of changes in the Russian economy as the old state sector has dissolved and new industries such as retailing and advertising have emerged. According to Goskomstat. the state statistics committee, the sbare of gross domestic product attributable to services has risen from 33 per cent

uring. Much economic activity in the service sector is conducted in US dollars and goes largely unrecorded.

The government estimates there may be as much as \$20bn in US dollar bills stasbed under mattresses - more than the value of rouble notes in circulation. It also estimates that some of the more than \$50bn of capital which has left Russia since 1991 is beginning to

While the World Bank estimates that a third of the population may now live below the official poverty ime, many millions of Russians are living far better than before. The bank suggests Russia's income distribution is now one of the most unequal in the world - on a par

with those of Argentina or the Phi-

The strength of Russia's informal economy is everywhere visible. Car drivers offer passengers rides for small fares, city dwellers sell crops from their allotments to neighbours, and officials receive additional income by means of kick-backs or bribes. Many Russians bave second or third jobs. Several consumer products com-

panies bave tried to assess spending power informally by employing women to conduct opinion polls in the streets. But even this data may be unreliable, since many do not give truthful answers - fearing the information will be given to the tax anthorities or the local mafia who will demand extortion money.

There is a lot of money in Russia. says one entrepreneur in Ekaterinburg, an industrial city in the Urals. "The statistics may not always show it. But you can just

MAN IN THE NEWS: Sir Iain Vallance

A smooth operator

ir Iain Vallance, the auper-smooth chairman of Britisb Telecommunications, prides himself on being a business leader who knows how to handle politicians. Ever since his days as a young graduate in the nationalised Post Office in the late 1960s, when be worked in the chairman's office, be bas boned bis political

This week in Brighton he took his vocation to new heights. In a blaze of publicity, culminating in a welladvertised private meeting with the Labour leader, he acaled an eyecatching "superhighways" agreement with Mr Tony Blair designed to boost the fortunes of both BT and New Labour. In the process, be sparked a ferocious government attack on Labour – and by implica-tion on himself – and a fresh burst of controversy over BT'a dominance of the UK telecoms market.

Under the arrangement, BT will get its long-sought freedom to provide broadcast entertainment to Britain's homes across new fibre-optic telecoms lines – the so-called "superhighway". In return, it has pledged to provide free connec-tions for schools, bospitals and

For Mr Blair it was an undoubted victory. Not only did it give his leader's speech the air of a ministerial broadcast, it also offered the promise of massive infrastructure investment at virtually no cost to a

Labour Treasury.
Forget that Labour is in combat with the other privatised utilities, and that if BT is allowed into the domestic entertainment market too soon it might strangle the cable operators, eliminating any serious competition in the local telecoms market. For Mr Blair - consciously echoing the technological enthusiasms of Harold Wilson 30 years ago - It is a model public/private partnership. He will boast of it all the way to the next general election dne

For BT, however, tha upside is less certain. Much may now depend npon Sir Iain having called the result of that election correctly. Lord Tebbit, a non-executive director of BT, has been characteris-

tically robust in his defence, but not all BT's aenior executives are as keen on Sir Iain's latest venture. Some are unconvinced that the company should jump feet first into multimedia for the home - at a cost of between £10bn and £15bn before demand for it is evident. There is also concern that the chairman, in rushing to leap aboard Mr Blair's bandwagon, may be showing

insufficient care for BT'a relations

with the present government. Sir Iain's political touch has not always been completely sure. He slipped badly earlier this year on the subject of the salaries of "fat cat" executives. At an appearance before a Commons committee be went on the offensive, telling MPs that be worked so hard for his keep that it might be "relaxing" to be a

junior doctor. "He thought he'd got the measure of them and could inject a few home truths to calm the furore," says a close colleague. He has not repeated

the attempt. His latest political venture could easily leave BT vulnerable. Sir lain insists there was no deal with Labour, just a response to an evident Labour willingness to implement a call from MPs for the exist-

ing BT ban to be lifted. "What's important for us is to have some degree of regulatory certainty." says Sir lain. But what if Mr Major, not Mr Blair, rules the

roost? "We are certain about the degree of uncertainty we face at the moment," be replies opaquely, refusing to be drawn on the private reaction to this week's "agreement" of Mr Ian Lang, the trade and industry secretary. Mr Lang has made spirited public comments in defence of the protection given to cable companies against early competition from BT.

in short, Sir Iain has taken a gamble. He will have to hope that, even if Mr Blair loses, the present gov-ernment would not extend the existing BT ban much beyond tha initial 10 years promised to the cabla companies in 1991. But politicians are a fickle crew, particularly when suffering from pique.

in any case, Sir Iam is unlikely to be at BT by then. Although only 52, be has been chairman of the UK's telecoms giant for eight years and chief executive for nine, and has always said be does not envisage ending his working days in telecoms. His decision to become a non-

executive director at the Royal Bank of Scotland may be a pointer. "It is interesting for me to have a foot back in my own country," be says of the job. His parents still live in Edinburgh, and it is not going unnoticed that Lord Younger, Royal Bank'a present chairman, will retire in the next few years.

Whatever bis next move, Sir lam's overall record at BT to date is hard to fault. He inherited an inefficient utility. It is now one of the most respected and go-ahead tele coms companies in the world Prices have fallen sharply in real terms. Efficiency has improved dramatically, with more than 100,000 posts shed in the past five years, yet

no serious industrial unrest. BT's most important challenge is where next". It has four obvious strings to its bow: large amounts of free cash to invest; a stake in MCL the second biggest US long-distance carrier, and with it a joint venture to provide one-stop services to multinationals, a share in Cellnet, the highly successful UK mobile phone operator; and the development of a UK "superhighway". A large part of this fibre-optic network is already constructed - but not the vital local network into residential homes and most public-sector institutions.

The problem is bow to develop

the last two of these - Cellnet and the move into residential multimedia - in a restrictive regulatory watchdog beaded by fellow Scot Mr Don Cruickshank, has not been persuaded by the argument that BT needs a free hand at bome to com-pete effectively abroad. Anyway, for all the bype, the international tele-coms market is developing alowly and the UK will be BT's bread and butter for the foreseeabte future.

This week's move by Sir lain is but his latest attempt to overcome what he sees as a regulatory block-age. If it succeeds, be could become prime minister Blair's favourite industrialist - the Lord King of the next government. If it fails, Scotland beckons.

Andrew Adonis

FINANCIAL TIMES

Proposed US legislation to limit immigration and change the status of non-citizens has provoked opposition, says Jurek Martin

t might be assumed that the current US obsession with immigration is mostly directed at illegal Mexicans streaming across the southern border. That was the thrust of California's Proposition 187 last year, which voted to deny them social services. And it has been a regular refrain this year in the presidential campaigns of populisl Republicans such as Pat Buchanan and, until he withdrew a week ago, Governor Pete Wilson of California

Tribes the

Nothing could be further from the truth Sprouting, like the Hydra, all over Congress are bills that could affect the status and hopes of all those drawn to, or already in, this nation of immigrants. So wideranging are the issues that even the likes of Microsoft, that jewel of the high-technology corporate crown not known as an employer of poor Mexicans, has become

The various bills would, for the first time, deny legal resident non-citizens the social services for which they have paid taxes and would set an arbitrary ceiling for the annual admission of refugees. Peopla seeking to bring in members of their immediate family would be subject to tighter reunification rules over who might be admitted. And exciting the interest of the semiconductor industry, fewer foreigners with special skills to offer would be admitted, with US companies facing the prospect of fees and premium wages for those they

Rejected by Statue of Liberty

Some of the proposals are in broad legislation, such as the reforms of welfare and the Medicare and Medicaid federal health programmes, all of which would circumacriba legal immigrant access. Noncitizens have emerged as easy targets for those in search of budget savings and for both the Buchananite "America Firsters", who loathe multiculturalism in all its manifestations, and the old, uniondominated left, consumed by the need to preserve American jobs for Americans. Specific attention focuses on

two immigration bills still in their congressional committee atages. The House version, more advanced in the drafting, is sponsored by Congressman Lamar Smith of Texas, the Senate counterpart by Alan Simpson of Wyoming. Both use as a working framework the report issued this summar by tha Commission on Immigration Reform, the presidentially appointed panel headed by Barbara Jordan, the former Democratic congresswoman from Texas and renowned fighter for civil rights.

This report, welcomed by a White House only too eager to rida the populist antiimmigrant wave with Mrs Jordan as protective cover, recommended that legal admissions, currently running at about 800,000 annually, be progressively cut to 550,000.

Immigration watchers: (left to right) Bill Gates of Microsoft, Senator Alan Simpson and presidential hopeful Pat Buchanan

Of this, 400,000 would be admitted under family reunification, but with priority given to US citizens' spouses and children who are still minors, over the parents, brothers and sisters of legal residents. The special skills category would be reduced to 100,000 from 140,000, and the current 20,000 unskilled quota abolished.

Only 50,000 refugees a year would be permitted to enter without an express waiver the US of those fleeing unreasonable persecution at home reached a recent high of

207,000 in 1980, dropped to 62,000 in 1983 and 1986 and was about 110,000 last year. Congressman Smith may be willing to raise the refugee cap to 75,000, but only if the principle of Congress setting a ceiling is codified into law.

But it was the recommendations on skilled immigrants that raised Microsoft's hackles. Its domestic labour force is about 25,000 and rising rapidly, of which about 5-7 per cent are foreign born. The commission proposed that employers pay a fee to the government of up to 30 per cent of the first year's

salary of an immigrant recruit, plus wages at least 5 per cent above the prevailing norm, and guarantee a minimum of two years' employment. The purpose, the report said, was for companies "to demonstrate the bona fide need for a foreign worker and to increase compet-

itiveness of US workers". Obviously the money is not a problem to for Microsoft (net income \$1.45bn in its last financial year) or any other US semiconductor multinational. Bnt the principle that they want is a problem, according to

Demetrios Papademetriou of tba Carnegie Endowment think-tank and the Washington expert in immigration matters. Ha says companies are perfectly capable of moving operations offshore if the reqmisite talent is denied them.

Bill Gates of Microsoft said as much in a letter to Congress last month, co-signed by the chairmen of Hewlett-Packard, Intel, Sun Microsystems and Texas Instruments, "The availability of electrical, computer and software engineers on a timely basis is critical to our business success," they wrote.

"Delays in design, development and production mean a loss of market share that may never be recaptured."

Dr Papademetriou, who, not coincidentally, has worked closely with Microsoft to lobby for changes in the bills, finds the proposed fees "unreasonable" at best, "extortionary" at 30 per cent, and an unnecessary intrusion by government into corporate affairs. Last month he offered Senator Simpson's sub-committee his own proposed reforms for admitting skilled immigrants.
They expand on the "points"
systems used by Canada and
Australia, under which potential immigrants are assessed by the assets (financial, educational and professional) they offer their new country. The spectre of "big brother"

government was also raised by

another commission proposal to create a database run by the Immigration and Naturalisa-tion Service against which the job applications of all noncitizens would be checked to see if they were legal residents.
Those familiar with the legendary inefficiency of the INS, not
curable in the year that its
respected commissioner Doris Meissner has been in charge, scoff at the idea that it should be entrusted with such a pow-erful tool. Databases are not exactly perfect: Dr Papademetriou himself was once arrested

by the same name appeared on one used by the Secret Service. But to Congressman Smith tha idea has merit. "There is simply no other way to protect American citizens and to reduce the magnet of jobs," he told his sub-committee, given thet 40 per cent of the estimated 4m "undocumanted" aliens in the US had simply ontstayed their visas and merged into society.

appointment because a felon

is subcommittee passed the computerised database proposal, but only by a 17-16 margin. Congressman Bill McCollum of Florida, another Republican, went further in proposing soma kind of super social security card to serve as universal identification for those in the joh market or seeking benefits.

All this has produced an improbable coalition of interests against the two immigration bills. It includes not only Microsoft bnt small businesse uneasy about government intervention, civil libertarians of left and right and the Cathobc Church concerned over family reunification. It does not at sent include any prominent Republican, Democrat or independent candidate for the presidency.

Whether Microsoft wins its case or not, sadly likely to be lost in the wash are future refugees, legal residents in reduced circumstances and. too easily forgotten, the poor was supposedly all about.

Shaky pillar of the community

he Roman Catholic Church in Ireland, that bastion of Irish state and society, is in crisis. Barely a month has gone by in the past year without some revelation or allegation of priestly misconduct, or some evidence of confusion in the once-revered college of conservative bishops who rule the Church. The majority of cases have focused on child abuse, perhaps the ultimate betrayal of

trust for a clergyman. The reaction of the Church leadership has often compounded the problem. It has been defensive about the Church as an institution, rather than showing concern for the welfare of the victims. And it bas suggested by its actions that it sees itself as above the law, capable of dealing with the offences and misdemeanours of its priests outside the normal legal process

Now, on top of its internal travails, the Catholic Church is fighting a battle against the introduction of legal divorce in Ireland, with a referendum to be held on November 24. The latest opinion poll suggests that public support is running two to one in favour of legalising second marriages, something the bishops have furiously opposed for decades.

into question the influence of the Church in virtually every aspect of life in southern Irish society, and shattered the morale of its priesthood in a country that boasts more Catholic priests per head of population - one in 800 than any other.

"It is a traumatic upheaval, without any doubt," says Father Gabriel Daly, an Augustinian friar and lecturer in theology at Trinity College, Dublin. As a priest, he feels affected by the series of scandals: "I feel guilt by professional association."

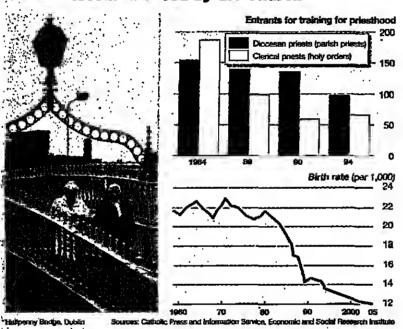

The problem is not so much a crisis of faith as a crisis of the Church as an institution, he says. "It is a huge shift with regard to the perception of the Church and its place in society. It has already damaged the Church as an institution very seriously." Many Catholics would welcome a shake-up in tha hierarchy, he adds.

Observers of Irish society believe tha Church has failed to keep pace with the social. economic and demographic changes of the past 40 years.

Since the late 1950s, there has been rapid urbanisation, with a consequent decline in traditional rural society, a sharp increase in prosperity, and an opening of Irish society to the outsida world – first through television and then through membership of the European Union. As wealth has risen, the

Behind the turmoil in the priesthood lie momentous changes in Irish society, say Quentin Peel and John Murray Brown

Ireland: less influenced by the Church

emigration of young people has dropped sharply, causing a sudden increase in the hirth rate. This at first could not be contained, because of the Church's resistance to contraception.

Dr Garret FitzGerald, the former Irish prime minister, sees such demographic changes as crucial to understanding the upheaval in Irish society. They are still working their way through the system. Since 1980, the birth rate has declined again, because of ever more available contraception, the increasing number of young women at work, and a sharp drop in marriages.

The annual number of births has dropped from 74,000 to 48,000 over the past 14 years, but there has been a big increase in births outside marriage to more than 10,000, as well as an estimated 4,000 abortions (mostly per-

formed in Britain).

At the same time, in spite of steady economic growth, the earlier bulge in the birth rate has contributed to a stubbornly high level of long-term unemployment. Some 48 per cent of the jobless have been out of work for more than a year, and one in four for more

ous and well-educated, the other unskilled and jobless. "That is not a stable society in any sense," Dr FitzGerald says. "There is a huge revolution taking place. Some of it is liberalisation. Some is destabilising."

than three years. Ireland is in effect two

economies - one increasingly prosper-

The Church leadership has simply failed to cope. "The Church was quite ill-equipped to deal with [the latest scandals]. They have undermined its moral authority," says Dr FitzGerald. The trail of disgrace goes back two

vears to a case involving Bishop Eamonn Casey, the primate of Galway, who was revealed to have had an affair with an American divorcee. Bnt the greatest shock came a year ago, when Ulster television broadcast a documentary on the case of a paedophile priest, Fr Brendan Smyth. In spite of repeated allegations against him of child abuse, he had been allowed to continue to act as a priest in Ulster and in Kerry and Cork in the south of Ireland for 30

"What we are seeing today are still the reverberations of that affair," says Mr Andy Pollak, religious affairs correspondent of the Irish Times newspaper. "For the last year, the Church failed to understand the deep anger of devout Catholic parents, that this monster of a man was able to have access to children over a 30-year period."

Since then, there has been a series of allegations of child abuse against priests, some of them dating back 20 or 30 years. "It is very difficult to be a priest now," he says. "Cruel jokes are told in their presence. They have very

It is a measure of bow much southern Irish society has changed that it now worries less about how its actions will be viewed in the north. Back in 1986, when Dr FitzGerald called the first referendum on divorce, a strong argument for reform was the need to reassure sceptical Protestants In Northern Ireland. The Protestant community has traditionally resisted reconciliation with the sonth, let alone unification, because of its perception of the republic as a priest-ridden

ew southern Irish voters today believe the steady progress anything to do with reassuring intensive, big owners are putthe north. It is happening because of the internal dynamics of society. In the latest opinion poll, 78 per cent said the reaction of the Northern Irish would not influence their vote, against 14 per cent who thought it might.

Dr FitzGerald believes that Ireland is one of only two European states - the other is Germany - to redefine its national identity successfully in the latter half of the century. It has done so by abandoning its insistence on Irish unification and recognising that it can come about only with the consent of the unionist majority in the north, and by accepting the need to dilute its sovereignty in the European Union.

As a result, the country is a far more self-confident, self-sufficient place than it used to be. Success in other areas from the international stardom of pop groups such as U2 and the Cranberries, to the Nobel Prize for literature for Seamus Heaney announced on Thursday has bolstered its self-image.

A willingness to rebel against the

heavy-handed leadership of the Church may be part of the same process. "It is going to be a much smaller Church,' says Fr Daly. "It will be more pluralis-tic. It will be a much more lay-centred Church. The pervasive influence will gradually go. People who go to church will do so of their own free will."

ritain's pubs are changing. Qniet, back-street boozers serving beer to a few male regulars have long been ont of fashion. Many of the new pubs that are taking their place are large, multipurpose leisure venues; people want a wider variety of drinks, better food, children's play areas and entertainment, including sport on satellite television.

Greenalls' offer yesterday of £480m (\$760m) for rival pub group Boddington - which will create the biggest UK pub chain independent of a brewer may be only the first of a series of mergers as owners come to grips with fast chang-

ing patterns in British brew-

ing and pub going. Transforming pubs is an expensive business. A big new pnb converted from, say, a bank branch or car showroom can already cost film. The 15 largest pub chains - independents and brewers - are looking for a total of 250 to 350 new sites each year around the country, and the competition for property could drive up prices further.

As running a pub becomes more complex and capitalting their faith in professional managers and relegating traditional tenants, the long-standing landlords who know all their customers, to smaller establishments.

While some of these smaller pubs are marginalised, the big owners are fighting to win market share and cnt costs with large new establishments and extensive pub networks. To continue to wring deep dis-counts from ever bigger brewers, Greenalls reckons it has to be an even bigger buyer.

"We'll be buying 11/2m barrels [54m pints] a year," says Mr Andrew Thomas, Greenalls chairman That is conivalent to nearly 5 per cent of UK beer production.

It is not just a question of purchasing power. Greenalls reckons it can strip out some £12m of Boddington's corporate overheads by running the extra 450 pubs alongside its own 1,920 pnbs. "Deals like these put a lot of pressure on marginal pubs," said Mr John Spicer, SBC Warburg's drinks The strategy of increasing

the size of pubs and replacing tenants with managers will be tested by a string of pub company flotations in the next few months. Many are new businesses created from the thousands of pnbs that brewers were forced to sell by the 1989 Beer Orders - these were the regulations used by the government to weaken the traditional system whereby big brewers sold beer through pubs they owned.

First to the market in the next few weeks will be Enterprise Inns with 486 pubs. Then come Pubmaster, the 1.750 pubs of Brent Walker, the financially strapped leisure group; Magic Pub Company with 290; and Tom Cobleigh with about 90. They will have to convince investors they have sufficient economies of scale, financial resources and management skill to flourish. The road to flotation can be

difficult, as Century Inns found last February. It aborted its market debut when the Office of Fair Trading launched an investigation into

Revival of the 'Chatham

Chest' would ensure Navy

the industry'a wholesale beer pricing. Potential investors bad already noticed that a large chunk of Century's profits came from bnying beer cheaply from brewers and selling it to its tenants. Was Century big enough to continue to get large discounts from brewers if the market tightened or if wholesale pricing regimes were changed? In the event, the OFT gave the industry a clean bill of bealth. But the

size question remains. We buy 100,000 barrels of beer a year, putting us in the top 10 or 15 purchasers," says Mr Alistair Arkiey, Century's chlef executive. "We're big enough to get a decent deal and I'm not sure the brewers have mncb more to give Greenalls, even with Bodding-

Nor is Mr Arkley convinced by the argument that tenancies are becoming an unattractive business proposition for a pub owner. "They throw off casb and they are simple to run. A tecant can make a good living and the customer gets treated well by somebody wbo

This argument is reinforced about Bass, one of Britain's largest owners with some 4,000 pubs, which show high profit margins from tenancies. But Bass, already close to the government ceiling on the number of pnbs it can own. has like other national brewers moved to bigger bousea and sold off smaller ones; and because of the operational demands of large pnbs, big brewers have favoured manag-

ers over tenants. Amid the big pub deals and changing customer demands. bowever, there is still room for the traditional relationship. Mr Ben Vidler, tenant of the Wheatsbeaf, Newark, in the east midlands, says he earns a decent living and believes tenancies can continue to work as a partnership

between brewer and landlord. When Mansfield Brewery, which owns his pub, wanted to install a kitchen as part of a modernisation programme, he resisted fiercely. He says he knows better than the brewery what his cnatomers want. "There's nothing worse than greasy lips for killing the taste of beer," he says.

Priority for EU democracy

Tender in Portuguese, please

From Mr Giles Conway-Gordon. Sir, Your editorial "Laws made in secret" (October 3) commented on the secretive and essentially undemocratic nature of the European Community legislative process.

Some while ago you published an article by David Williamson, secretary-general of the European Commission (Personal View, December 15 1994), praising its achievements, openness and costeffectiveness. One of his claims (presumably unironic) was that with the new powers granted to the European parliament the system was | New York, NY 10019, US

In portfolio performance look to the record of value managers

From Mr David Morris.

Sir, Barry Riley'a informative article ("The trouble for Harry in modelling the All-Share", October 4) ends with Mr Harry Markowitz's observation that "just 200 basis points of excess return would rank the Cudos model among the best UK active managers".

The Cudos model takes a value approach to stock selec- |

tion. Therefore, it would make sense to compare its performance, not to all active managers, but to other value manag-

Having researched the strategies of 250 UK equity portfolios over the past nine years, we have identified 69 that use virtually the same value criteria as Cudos.

The best value managers are

those with top quartile performance compared will the All-Share. For the three years ending June 1995, the average outperformance of the 17 top quartile value portfolios in our database was 385 basis points. The worst was 200 basis points and the best was 635.

It is a truism that 200 excess basis points would rank any equity manager among the London SW1Y 4PZ, UK

best active managers in the UK. Over the past three years however, much more than 200 excess basis points would have been required to rank among the best value managers. David Morris, managing director, Johnson Fry Pension Consultancy.

20 Regent Street,

From Commander Roger Paine. Sir, The magnificent repro-duction of Canaletto's painting of Greenwich Hospital (Weekend Property supplement: "Up for grabs – a piece of England'a glory", September 30) and the report that the site is now "up for grabs" reminds

me thet just over 400 years ago Sir John Hawkins, who was then treasurer of the Tudor Navy, founded the "Chatham Chest" This was for the relief of sick

and wounded sailors and from 1625 onwards every man was ordered to contribute sixpence a month from his wages to this early charitable fund. The coins were dropped

through a tiny hold into the chest which was secured by four padlocks the keys of which were, reputedly, held by four different admirals in order to prevent clandestine embez-

In 1803 the chest was renamed the "Chest at Graenwich" and the accrued contents combined with the funds

retains Chatham House of the Greenwich Hospital to maintain the buildings which now comprise the RN College, Greenwich. The original chest can still be seen at the nearby National Maritime Museum.

As the Greenwich College site is now on the open market at an annual rental of £400,000 it might be appropriate to reestablish proper use of the chest and to obtain mandatory contributions from today's serving officers and men.

By conservative estimates of inflation sixpence (21/2p) must be worth at least £10 so thet one month's contributions of this sum from everyone in the 1995 navy would easily pay the first year's rent in advance and ensure the navy remains at this historic location.

Messrs Knight, Frank & Rutley as estate agents responsible for finding a suitable tenant could be custodians of the padlock keya. Roger Paine, RN.

CURRENCIES AND MONEY

Franc sinks

By Philip Gawith

Foreign exchanges had a hectic day yesterday with 6 sharp fall in the French franc forcing the Bank of France to take preven-tive measures to protect the currency.

The central bank closed its 5-10 day lending window after the franc had fallen more than five centimes on the day against the D-Mark. By making it more difficult, and expensive for speculators to borrow the currency, the BoF managed to stop the rot, with the franc closing in London at FFr3.514, after earlier falling as low as FFr3.522, compared to Thursday's close of FFr3.468.

The trigger for selling was renewed rumours that Mr Alain Juppe, the prime minister, would resign, although the main reason for franc weak-France will not be able to meet the Maastricht convergence criteria without 6. weaker cur-

WORLD STOCK MARKETS

US stocks edge ahead at midsession

Wall Street

US shares edged higher in early afternoon trading yesterday after initially following bonds lower, writes Lisa Bransten in New York.

The Dow Jones Industrial Average fell more than 15 points within 15 minutes of the opening on the heels of a slipping bond market, but by early afternoon, the index was trading 7.95 higher at 4.770.66.

The Standard & Poor's 500 added 1.16 to 583.79 and the American Stock Exchange composite rose 1.95 at 534.35. NYSE volume was light at 182m shares.

Employment figures released by the Labour department

Political and currency turmoil

drove PARIS lower in early

trade and by midsession the

CAC-40 index had fallen nearly

3 per cent. There then followed

a reversal in fortunes as the

Bank of France stepped into

protect the franc from specula-

tora, one of whom waa

rumoured to be Mr George

Soros. The central bank closed

the five-to-10 day lending rate,

replacing it by a 24-hour emer-

gency window. Meanwhile,

rumours that Mr Alain Juppe,

the prime minister, had

resigned were denied firmly by

the anthorities. The market

regained some semblance of

balance, and closed up 9.25 at

1,809.57, for a rise of 1 per cent

Nomura in Paris commented

that, in effect, there had been a

managed devaluation of tha

franc over the last few days.

While the government was

unlikely to come out and

announce a formal devaluation

of the currency, calls for the

authorities to cease tracking

the D-Mark were not going to

go away, he added. However, he felt that there was a good

chance now that the market

could begin to recome some of

the 5 per cent fall that it had

sustained over the last month.

"We are moving into a period

SOUTH AFRICA

Johannesburg moved firmly ahead with strong demand noted in most sectors although golds headed lower as the bullion price remained static. The overall index rose 23.8 to 5,729.6, industrials picked up 42.2 to 7.217.9 hnt golds lost 17.7 at 1,486.7. Anglos picked up 75 cents to R209.25 and De Beers was 40 cents np at

Vienna beats a path down from the peaks

Ian Rodger on the role of red and black politics

The message in Vienna this week - although not delivered with much conviction - was that the stock market had finally bottomed

The Vienna market has put on an unusually contrary performer in recent weeks, heading determinedly downwards while many other European markets have been doing very

In the year to date, the ATX index of 23 leading shares has underperformed European markets, excluding the UK, by 14 per cent. In the past month alone, it has underperformed the German market, which it normally echoes, by 10 per

There is no simple explanation for its behaviour. The Austrian economy continues to advance, although the strong echilling, which is tightly linked to the D-Mark, has been hurting tha important tourism sector and the balance of payments more than expected. And many companies have been reporting strong profit

The negative influences come mainly from Austria's bizarre political scene, but that too is a surprise. In the past, investors have paid little attention to the opaque horse trading between the "reds" (social-"blacks" and (conservatives) that keeps their grand coalition on the

This year, however, the annual budget negotiations have been unusually acrimonious, apparently because the new leader of the conservative People's Party senses a rise in his party's popularity and is threatening to go for new elections unless he gets more of what he wants.

Many investors suspect that one of the main things he wants is a commitment from the red finance minister that Creditanstalt-Bankverein will stay in Austrian hands.

The impending completion of the privatisation of Creditanstalt, the country's second largest bank, bas been another factor driving down the market. Creditanstalt shares are among the most liquid on the market

and are seen by some international investors as a proxy for tha whole. However, since mid-July, when the government revealed an evaluation of the bank by JP Morgan, the investment bank, Creditanstalt's preferred shares have lost 11 per cent of their value.

Analysis say that the decline indicates that the JP Morgan valuation of Sch660 to Sch700 per ordinary share is too high, and so the international offer of the government's 70 per cent voting stake, announced in August, is likely to fail. The privatisation would then get ogged down again in political

Apart from political worries,

Austria

investor confidance in Austria has again been shaken by poor disclosure practices of a leading company. In April, Maculan, a once high flying construction company, suddenly reversed a forecast of profit gains for this year, indicating that its profits would be lower because of problems in eastern Germany, Last month, the group admitted that "a considerable loss" was in store and that it had thrown itself on the mercy of its bankers. The preferred shares have plunged from over Sch1,200 a year ago to Sch165 this week.

A final drag on the market in the past month has been the impending privatisation of Voest-Alpine Stahl, the hig integrated steel producer. "People who did not want to raise their Austria weighting sold other shares so they could buy this one," says Gerhard Auer

This week, VA Stahl appeared and was a roaring success, mainly because OLAG, the Austrian state industrial holding company, agreed to a very attractive price. In grey market transactions the shares were trading about 5 per cent above the Sch285 issue price.

All of which leads Mr Gerhard Fleischer, strategist at Creditanstalt Investment Bank. to believe that the market has bottomed for the time being. Mr Fritz Schweiger at Investmentbank Austria, adds that the Austrian market as a whole is now quite inexpensive compared with other European markets, with no risk premium against bond prices. "We are quite optimistic; we are looking for a 5 per cent gain by

the end of the year," he says. Ms Felicity Smith of ABN Amro Hoare Govett in London is less sanguine. She considers the Austrian market unreliable because of the lack of a strong domestic institutional investor base and relatively poor disclosure policies at many companies. "We have Austria perma-nently underweight." Ms

Her strategy is to concentrate on the shares of the few companies that are exposed to international competition and have high standards of report-

Mr Robin Horne of Kleinwort, Benson in London, suspects that the market recovery may be delayed by uncertainty about yet another part-privati-

öhler-Uddeholm was floated earlier this year in difficult market conditions and the initial offering had to be scaled back. However, both the company and the shares have performed so well that OIAG may be able to get away some more shares

before the end of the year. So Mr Horne is looking for a Christmas or January rally. However, he and other analysts suspect that any recovery will be shortlived. Next year's government budget negotiations promise to be even rougher than this year's, they

2.5m shares. The return of the dollar to the Y100 level, and a Jiji Press report that Japan and the US will agree to toler-ate a further rise in the dollar when they meet in Washington this weekend, contributed to

the positive tone. After a slow morning ses sion, the market began to build up momentum in the early afternoon. Arbitrageurs bought stocks as index futures moved higher and shipbuilders, oils and some banks attracted active bnying. Most aectors were up on the day, but large capital stocks such as steel makers and shipbuilders drew the most active trading and captured five places on the ten most active list. Mitsubishi Heavy Industries was the most active, moving up Y8 to Y805; among its competitors, Hitachi Zosen rose Y2 to Y515 and Kawasaki Heavy Industries Y4

to Y440. Steel shares, although actively traded, posted mixed results. Nippon Steel was second on the most active list but ended flat at Y355. Kobe Steel ticked up Y1 to Y279 and NKK day lagged behind sell orders. Y2 to Y267, while Kawasaki buy orders by foreign investors

SPOT THE REFUGEE

There he is. Fourth row, second from the left. The one with the moustache.

Obvious really. Maybe not. The unsavoury-looking character you're looking at is more likely to be your average neighbourhood slob with a grubby vest and a weekend's stubble on his chin.

And the real refugee could just as easily be the clean-cut fellow on his left. You see, refugees are just like you

Except for one thing.

Everything they once had has been left behind. Home, family, possessions. all gone. They have nothing.

And nothing is all they'll ever have unless we all extend a helping hand. We know you can't give them back the things that others have taken away.

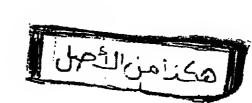

United Nations High Commissioner for Refugees

We're not even asking for money (though every cent certainly helps).

But we are asking that you keep an open mind. And a smile of welcome. It may not seem much. But to a

refugee it can mean everything. UNHCR is a strictly humanitarian organization funded only by voluntary contributions. Currently it is responsible for more than 19 million refugees around the world.

MARKET REPORT

Equities under heavy fire ahead of G-7 meeting

By Steve Thompson. UK Stock Market Editor

200 € - 1 1 M3.65.

State of the state of

The four-day advance by UK equities came to a grinding halt yesterday as European stock markets reacted violently to an early sell-off in bond markets. The weakness in bonds, bunds and gilts stemmed from another bout of extreme nervousness in foreign exchange markets, where the D-mark initially moved higher against the dollar and

the French franc. By the end of the session the turbulence in currencies and on the Paris bourse had mostly subsided, but by then the damage had been

London's FT-SE 100 index, which arlier in the week had begun to consensus estimates of around 150earlier in the week had begun to look as if it was about to made a strong advance towards its all-time high point, reached in the middle of last month, closed a net 17.9 lower at 3,526.5. The FT-SE Mid 250 index. meanwhile, was also on the retreat,

ending the session 12.3 off at 3,979.0. The rally in London mirrored a rapid recovery by Wall Street, which had been troubled at the outset by the nervousness surrounding currencies and ahead of this week-

end's G-7 meeting in Washington. Wall Street had initially moved sharply lower in the wake of the US employment report for September which showed non-farm payrolls for

160,000, and which had raised fears that the US economy was slowing faster than most forecasters had

However, a gradual improvement in the dollar and in US treasury bonds triggered a sbarp npward move by the Dow Jones Industrial Average which, having dropped around 20 points shortly after the opening, was trading some 10 points higher after London closed.

London opened the session virtually level, but helped by the latest takeover bid, the £500m-plus agreed offer from Greenalls for Boddington

With no follow-through in a market being affected by the sustained weakness of other leading European bourses, London began to attract intermittent bouts of selling pressure and was also said to have been unsettled by talk of a trading pro-

LONDON STOCK EXCHANGE

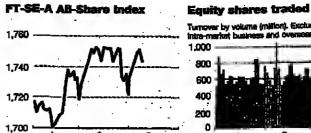

At its worst, just before Wall Street opened, the FT-SE 100 was down 29 points, before it embarked on its recovery trend.

Marketmakers were unhappy with the performance of the leading atocks and forecast a turbulent week ahead. The Conservative Party Conference gets underway in Blackpool on Monday morning and the market will also have to negotinomic news both here and across the Atlantic.

"What we really need to get the market up and running again is a big FT-SE bid," said one weary marketmaker. Others insisted, however, that the utilities areas would provide continuing excitement for the market next week.

Of the remaining recs East Midlands and Yorkshire are seen as prime targets in a shrinking electricity sector.

Turnover reached 666m shares non-FT-SE stocks accounting for 62 per cent of that figure. Customer business on Thursday was worth

Oil price worries hit leaders

Oil price worries took a broad swipe at the sector, depressing share prices of the integrated majors and exploration groups.
Brent Blend showed signs of

stabilising yesterday, hut a bearish note from SGST looked to have the way for a nervous run-up to the third quarter results season. The big US ofl groups start reporting on October 23 while BP and Shell weigh in early next month.

Both BP and Shell came off steeply, falling 6 apiece to 479p and 757p respectively. Among exploration groups LASMO dipped 3 to 161p and Hardy Oil shed 4 to 191p in spite of a strong huy recommendation from NatWest Securities. Enterprise Oil closed 6 lower at 341p. Sector bulls NatWest Securities have been trimming their oil price estimates lately. but are still going for \$19 a barrel in 1996. SGST take a more negative view of demand and supply trends, notably in relation to the possible reemergence of Iraq as a prodncer nation. The broker is looking for \$16.50 a barrel in 1996 and \$16 in 1997.

Aran Energy, currently fending off a £151m bid from US oil giant Atlantic Richfield, stood out against the general downtrend, jumping 5% to 73%n in 6.1m traded after the group claimed to have received an

approach from a third party. Enterprise, which has its LASMO stake disposal money to spend, and Hardy were the hot tips for possible "white knight". Statoil of Norway was also mentioned by some deal-

GEC hits high

Electronics giant GEC continued to impress, closing a strong week at the top of the Pootsie performance charts with a gain of 91/4 to 3391/4p, a new 1995 high and the shares' best level since February 1994. Buoyed by rumour and

counter rumour linked to the long-running management succession story, GEC has put on 7 per cent over the past five days and been heavily dealt throughout each session. If there is a consensus in the City, it would probably suggest that outside appointments sometime next year to replace Lord Prior and Lord Weinstock currently hold sway over the serious betting.

Some houses, concerned the stock with several inves-

about the outlook for corporate earnings, have begun to steer clients towards defensive, lowgrowth stocks with cash heavy balance sheets.

Turnover in bid target Fisons had reached 23m by the close making it the day's most actively traded stock. The shares edged 1/2 forward to

Earlier In the session, the drugs group, currently under siege from US group Rhone-Poulenc Rorer, said that it had asked London stock market regulators to investigate the may have led to the creation of a false market. Fisons admitted RPR now holds just under 17 per cent of Fisons Ordinary

shares. However, one close observer of the bld said: "Frankly I think this is a bit of bluster on the part of Fisons." He added: "From what I can see, investors are slowly starting to accept the Rhone-Poulenc Rorer offer even though they are doing it grudgingly.

Volume in WH Smith Group jumped to 14m. Cazenove, the company's broker, was said to have bought a block of around 7m shares at 359p and placed

MFI Furniture was demand following an anal visit to France hosted by company on Thursday. The shares added 6 to 144p. Broker's recommendations helped boost Storehouse which published a trading statement on Thursday. The shares hardened 2 to 306p.
In the drinks sector, Green-

alls Group was the day's worst performer in the FT-SE Mid 250, as it launched an agreed £518m bid for Boddington Group, the pnbs, hotels and nursing homes company. The offer values each Boddington

share at 412p. Shares in the former closed 264 down at 462p, while the latter surged 31% to 389%p to end the session as the best performer in the Mid-cap index. Volume rose to 5.5m.

One analyst said: "This deal makes good strategic sense for Greenalls."

The positive sentiment flowing from the bid for Boddington helped boost trading in several other stocks in the sector. Greene King appreciated 4 to 637p, while Morland firmed 5 to 520p. Regent Inns put on 4 to 604p. However recent bid speculation heard in Vanx Group faded yesterday leaving the shares trailing 11 to 289p. Among banking stocks, Royal Bank of Scotland contin-

ued to benefit from positive sentiment at a banking conferance held Merrill Lynch on Thursday. The shares gained 4 Bank of Scotland followed

the market lower easing 2 to heavy trading in its shares. 238p. The group held a presen-The company said the trading tation at BZW on Thursday and the investment bank remains a fan of the stock. performing Pootsie stock in

10m traded. One big seller was said to have done most of the day's damage. The shares closed 6% lower at 258%p. Sentiment was also affected by a note from NatWest Securities which helped investors refocus on the debate over the renegotiation of the group's long-term gas contracts.

Among publishers, United demand, putting on a further 7 to 545p. Both Panmure Gord and Smith New Court ha turned positive on the sha

which have added 16 in twodavs.

SNC have turned buyer on the improved outlook for advertising revenues in 1996 with the possible sale of a national newspaper - the group owns the Express and Star titles - adding further

Media conglomerate Pearson dipped 10 to 593p and Reuter, which is to make a presentation in China next week, lost a penny to 552p. The information giant will spend Monday and Tuesday unveiling its emerging markets strategy to audiences in Shanghai.

Floated at 115p, Edinburghbased builder Morrison Group made a good debut, closing at 118p in L6m traded.

Dealers were bracing themselves for another bout of takeover activity in the regional electricity stocks.

Last week saw bid action in Norweh, where the Texas twins, Houston Industries and Central & South West topped North West Water's bid, and in National Power launched an

agreed offer. Of the remaining stocks East Midlands. 3 cheaper at 894p yesterday, and Yorkshire Electricity, marginally easier at 913p, are viewed as prime tar-

Belgian court requests permission to indict Claes on corruption charges

Nato chief faces pressure to quit

By Emma Tucker and Caroline Southey in Brussels

Claes, Willy the secretary-general of Nato, was expected to come under new pressure last night to resign after Belgium's highest court requested permission from parliament to

indict him on corruption charges. The news could unsettle the 16nation defence alliance which is at the centre of attempts to negotiate a peace settlement in Bos-

Mr Claes was attending a meeting of Nato defence ministers in Williamsburg in the US yesterday on the Bosnia crisis.

The public prosecutor in Belgium wants to charge Mr Claes in connection with a political scandal involving kickbacks for military contracts, Belgium's highest court announced.

The public prosecutor will show his evidence to a special parllamentary committee on Monday, which will decide whether Mr Claes should face the charges of bribery which impli-cate him in the so-called Agusta scandal.

This centres on allegations that the Italian defence manufacturer offered bribes to Socialist politicians to secure a government contract for 46 helicopters.

Mr Claes, Belgium's economic affairs minister at the time Agusta sold the helicopters to the Belgian army, was one of two ministers to sign the contract. Under Belgian law, ministers

and former ministers can only be prosecuted with the permission of parliament. If parliament gives go-ahead then the pressure on Mr Claes to resign could become overwhelming. A decl-sion is likely before the end of next week.

A Nato spokesman said last night there was no comment from the alliance. Officially, Nato

has always said that the investigation involving Mr Claes was a domestic Belgian affair and had nothing to do with his role as head of Nato.

But Nato members were divided in their support for Mr Claes earlier this year when he was first implicated in the affair. The US offered the secretarygeneral unconditional support, while Denmark and the Netherlands believed he should step down until the affair had been

cleared up.
Mr Claes has always maintained his innocence, but has admitted discussing the matter of the illegal payments with the treasurer of the Socialist party.

The scandal has already led to the resignation of four Belgian ministers, including Mr Frank Vandenbroucke, who was foreign minister, earlier this year.

Ritz sold to Barclay twins for \$120m

By Tim Burt and David Wighton

The Ritz, the historic London hotel patronised by royalty and used as a wartime refuge for foreign governments, was yesterday sold to David and Frederick Barclay, the reclusive UK property tycoons, for £75m (\$120m).

The twins, who own The European newspaper and other hotels in London, Monaco and New York, have acquired the famous hotel from Trafalgar House, the troubled industrial conglomerate.

A spokesman for the Barclays said the deal fulfilled a 30-year ambition to own the Ritz. It was unclear, bowever, wbether they would bonour a management contract signed between Trafalgar and the Mandarin Orient the Ritz's value in its balance day that by strengthening the

Hotel Group, which has been run-ning the Ritz since May last year. They've been successful running other businesses and they will manage the Ritz their way." the spokesman added.

The hotel was the main venue for London's café society, before hosting refugee royal families during the second world war.in more recent years, it has boasted celebrities such as the Rolling Stones and Andy Warbol as regular guests

For Trafalgar, which in 1976 paid £2.75m for the Ritz, the hotel represented a non-core business and its disposal marked the group's withdrawal from the sector after almost 20 years.

In 1993, Trafalgar wrote down

sheet to £60m, so the sale will generate a profit of £15m, helping to shore up the group's deterior-ating finances. It has already sold its other hotels, including the Stafford and Dukes in London. Although the Ritz made operating profits of £3.78m in the year to September 30, its contribution has failed to offset mounting losses elsewhere at Trafalgar.

The group is expected to report heavy losses for the year ending this month after an interim loss Analysts believe a large out-

flow of cash would have left Trafalgar with borrowings of more than £200m before taking the Ritz proceeds into account.

There was speculation yester-

balance sheet, the sale might allow Trafalgar to write down the value of its Cunard cruise line. The group is currently conducting a strategic review of Cunard, expected to he completed later this year.

Funds raised by the Ritz dis-posal may also reduce the risk that Trafalgar will pass the dividend on its convertible preference shares, which would save it £26m. The preference shares rose 3p to 51/sp while the ordinary shares added 1p to 31p in relatively heavy trading.

Brussels agrees to extend ban on export of cheap EU drugs

By Motoko Rich in London, Emma Tucker in Brussels and Judy Dempsey in Berlin

The European Commission bowed to pressure from the pharmaceutical industry yesterday year a ban on the export of lowerpriced Spanish and Portuguese

drugs to other EU countries. Responding to appeals from the French and German governments, the Commission also said it would consider further possible protection for individual EU states which asked for safeguards. Such countries would have to prove cheap imports from Spain and Portugal would cause "grave damage" to their domestic pbarmaceuticals industries.

Northern European countries fear that if the bans are lifted, wholesalers will huy drugs in the Therian countries, where prices are cheaper and import them to the northern countries where they can usually be sold at

The import restrictions date back to the accession of Spain and Portugal to the EU in 1985, when the two countries were forbidden to export drugs to other EU states because they lacked adequate patent laws. The bans

Spain and Portugal or previously

imported into those countries. Although both states have since passed patent laws, the Commission extended the controls after pressure from drugs companies in northern Europe.

The bans were widely expected to expire today. However, the clauses covering drugs in EU accession treaties for Spain and Portugal are ambiguous, with some of the language suggesting the rules were intended to stay in

force until the end of the year. Although a majority of Commission memhers this week believed the treaty's drafters intended an early expiry to the han, they vesterday agreed to accept the alternative interpretation. Diplomats said the Commission had done this to accommodate the French and German demands without appearing to change the deadline.

Germany said yesterday it intended to lobby Brussels for further safeguards after Decemdo the same. Last night the UK government lodged a similar

However, the Commission yesterday said France and Germany would have to show severe economic difficulties would result from a decision to allow the Spanish and Portuguese exports in. "The Commission does not consider that it has sufficient evidence to evaluate this yet," said a Commission official

The German pharmaceuticals association claims its domestic industry will lose up to DM2bn (\$1.4hn) in sales when non-patented products from Spain and Portugal are sold to the rest of the EU. in the UK, the industry estimates its annual losses could reach \$100m.

Eurotunnel posts loss

Continued from Page 1 standstill period can run for up

to 18 months. The company's opening posi-tion is to seek a reduction in interest payments, currently piling up at a rate of about £60m a month, and an extension in the maturity of its debt. However, analysis still believe that the d crepancy between revennes and

mately prove unavoidable. Sir Alastair claimed that there was no danger that the banks would not have their principal

interest payments is so large that major surgery such as a

debt-for-equity swap will ulti-

Mr Graham Corbett, Eurotunnel's finance director, said in Paris that the company was considering Issuing new financial instruments to raise new capital. snch as the possible use of convertible bonds.

The company yesterday forecast that 1995 revenues would be £275m, against £525m predicted in its 1994 rights issue prospectus. Eurotunnel shares closed np %p at 92%p.

LOW

THE LEX COLUMN

Le shareholder shuttle

Call it a debt-for-equity swap or a deeply-discounted rights issue underwritten by the banks. Or invent some other clever mechanism for reducing debt and increasing equity. The exact method used to refinance Eurotunnel's £8.5bn (\$13.2bn) debts is of secondary importance. Whatever happens, exist ing shareholders cannot expect to end up with more than crumbs.

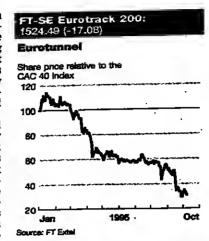

Few analysts do proper discounted cash flow analyses of Eurotunnel any longer. But even optimists agree that the project's net present value is less than its £8.5bn debts; pessimists think it is less than £4bn. But, if the project's value is anywhere within the £4bn-£8bn range, the interest theoretically attributable to shareholders is nil. That does not mean shareholders will, in fact, end up with nothing. The banks are reluctant to take the extreme measure of tipping Eurotunnel into hankruptcy. But equally, it is hard to see them accepting a sub-stantial devaluation of their loans while shareholders continue to hold equity with a market value of over £800m. Shareholders will be lucky to

be left with more than half. If the prospects for shareholders are grim, the outlook for banks is probably not as dire as the secondary deht market - where Eurotunnel loans trade at about half face value - suggests. Assume the project's net present value is £6bn - in the middle of the £4bn-£8bn range - and that existing shareholders receive an economic interest worth £400m after refinancing. On that basis, the hank's notional £8.5bn debt is actually worth £5.6bn, or two-thirds of face value. Gutsy investors would sell the equity short and buy the debt.

Trafalgar House

The sale of the Ritz is a triumph for fans of trophy assets. Trafalgar House has been much criticised for the 260m at which it valued the hotel in its balance sheet. But like newspapers and football clubs, the value of top hotels has little to do with economics. Yesterday's £75m disposal price equates to £575.000 a room, well above the £300,000 a room at which most of London's other five-star hotels are val-

The proceeds will certainly belp the ailing conglomerate's finances. With engineering and construction bleeding cash, Trafalgar probably finished its financial year to September with debts of around £250m. The market has been speculating that the group will pass

the dividend on its preference shares to save their £26m cost and this has driven their yield up to 15 per cent. That looks less likely now. Given that dividends would accumulate in any case, the preference shares look a bar-

But risks remain. Trafalgar is overhapling its Cunard cruise ship division, which could lead to a write-down of Cunard's £300m halance sheet value. Further provisions are also possihle. The key question is to what extent Hongkong Land would support Trafalgar in any new crisis. Hongkong Land is unlikely to walk away entirely, but it might force a break-up. Unless management pulls off more disposals like the Ritz, a forced sale of assets would not do much more than cover repayment of preference capital. That would leave little for ordinary shareholders.

Greenalls/Boddington

Having followed near-identical strategies, puh retailers Greenalls and Boddington were bound to make a good fit. But the promised cost savings from Greenalls' latest acquisition exceed all expectations. Greenalls promises to save £18m a year from the deal - equal to 60 per cent of Boddington's 1994 profits. Much of the benefit comes from merging their wholesaling operations and removing its head office. The acquisition should therefore have no impact on earnings. excluding reorganisation costs.

The enlarged Greenalls will have 4 times interest cover. But debt should fall steadily. Boddington's retirement home business alone could fetch £70m. Besides, group capital expenditure will

l flow for Major A Mule Minister efects to Labor amount to some £140m next year, with only £40m required to maintain the existing pub and hotel portfolio. Management can slow the investment programme if a miserable British summer hits beer sales and cash flow.

The Boddington acquisition is a useful £480m insurance policy. With a shrinking number of British brewers, size will become more important for puh owners negotiating competitive beer supply contracts. Smaller high quality pub retailers are likely to be swallowed to build up buying muscle. But life could become difficult for smaller owners of tenanted pubs. They are less likely to become bid targets because they cannot be integrated into a branded pub network. And without huying muscle, their margins will be

Mutual insurers

The conversion of huilding societies to banks has been a bonanza. Is there a similar windfall to be gained from the conversion of mutual life companies? If one extrapolated from the £100 General Accident is paying to each policy-holder to take over Provident Mutual, the answer would be no. But it would be a mistake to view this as a precedent.

The meagre bonus is a reflection of the fact that Provident's back is against the wall. Poor investment performance and a sharp drop in new husiness have virtually eroded its surplus funds. Its free asset ratio is only 0.6 per cent, against the 4 per cent or so its peers enjoy, in order to raise this cushion to a more acceptable level, General Accident is having to inject £145m into the fund.

Some argue that policy-holders would fare better if Provident closed the fund to new business. That would certainly allow marketing costs to be slashed. But as policies matured, the continuing administrative costs would weigh ever more heavily on remaining policy-holders. Morenver, without a decent surplus, the fund would have to employ an excessively defensive investment strategy. The prospects of profits would be limited. Since closing the fund is not a real option, Provident's policy-holders are lucky to get a bonus at all. But that does not mean other mutual investors will have to settle for such paltry sums. If investment performance is strong and surpluses are fat, they too can expect

FT WEATHER GUIDE

Europe today Cloud and rain will dominate the UK and

western Scandinavia dus to low pressure along a frontal zone. This depression will also cause cloud and patchy rain in the Netherlands and northern Germany. France and the countries around the Alps will remain dry with sunny periods. Most of Spain will be very sunny. Cloud will linger from northstern Russia towards the Balkan countries due to an old frontal zone. Howevar, these regions will remain dry dus to high pressure over central and eastern Europe. Cooler air will move around this area of high pressure and afternoon readings in south-eastern Europe will be around 20C.

Five-day forecast

The Benelux, France and Germany will be dry and sunny because of high pressure over continental Europe. Countries around the Alps will also be very sunny with temperatures of around 20C. Meanwhile depressions will cross the UK heading for Scandinavia. As a result, cloud and rain will linger over northern and western parts of the UK. Thundery showers will break out next week over Romania, the former Yugoslavia and parts of Italy.

Turn any room into a concert hall.

introducing the Bose® Wave® radio for room- tons for your favourite AM/FM stations, dual alarms filling sound throughout your home.

When was the last time you enjoyed the distinct sound of orchestral strings in your kitchen? Or in the study? The new Bose Wave radio makes it possible

h's attractive and loaded with features. But the true beauty of this small wonder is the sound... it's higger, tichet and more lifelike than you ever thought a radio could be. Measuring just 4.5" high x 14" wide x 8" deep, the Wave radio is small enough to fir in any toom in your home. And with Bose's patented Acoustic Waveguide® speaker technology it fills any toom with surprisingly clear, lifelike sound.

The crinics approved.

The European called it "a dramatic improvement in sound quality" and according to The Sunday Times "The Wave radio is a great leap forward." We think you'll be equally impressed. The Bose Wave radio is designed both for great sound and for convenience. There is a credit card-sized remote control, pre-set bur-

and many other features. You can even connect it to a CD player or TV to enjoy any music you like.

Audition the Bose Wave radio in your borne.

The Wave radio is only available direct from Bose. For a free information pack, simply call the free number or send/fax the coupon below. Or to audition the Wave radio in your home for 14 days, satisfaction guaranteed, call:

0800 614 293.

	Please send me more information about the Bose Wase radio and the 14-day, satisfaction-guaranteed audition.
